Review Questions: Identifying Supporting Details

DIRECTIONS: Read each main idea. Use your textbook to supply the details that support or explain each main idea.

A. Main Idea: U.S. forces fought the Germans at sea and in North Africa, while the Soviets fought them at Stalingrad.

- Detail:** Roosevelt decided to invade Morocco and Algeria because experience and also help British troop. Generals Eisenhower and George Patton pushed German troops back in North Africa.
- Detail:** In the Atlantic, the Germans targeted US cargo ships in coastal waters. The navy set up a convoy system that greatly improved safety.
- Detail:** Hitler targeted the city of stalingrad in Russia to cut off the Soviet's from badly needed resources. The battle, which the soviets won, was a major turning point in the war.

B. Main Idea: After the Allied invasion of North Africa, the Allies made plans to strike Germany and Italy.

- Detail:** The Allied bombing campaign in Germany accomplished two things: it caused a severe oil shortage and wrecked the railroad system, and it destroyed many factories.
- Detail:** General Eisenhower commanded the invasion of Sicily with General Patton and British General Montgomery heading the ground forces.
- Detail:** The attack on Sicily caused Italy to surrender. In Italy, the Germans seized control of the fortified town of Cassino while the Allies landed at Anzio. Fighting in Italy lasted 5 months.
- Detail:** At the Tehran Conference, Roosevelt and Stalin agreed to divide germany after the war to prevent it from threatening world peace. Stalin also agreed to an peace orgnization after the war.

Harris, 2019-11-26 Designing a research project is possibly the most difficult task a dissertation writer faces It is fraught with uncertainty what is the best subject What is the best method For every answer found there are often multiple subsequent questions so it s easy to get lost in theoretical debates and buried under a mountain of literature This book looks at literature review in the process of research design and how to develop a research practice that will build skills in reading and writing about research literature skills that remain valuable in both academic and professional careers Literature review is approached as a process of engaging with the discourse of scholarly communities that will help graduate researchers refine define and express their own scholarly vision and voice This orientation on research as an exploratory practice rather than merely a series of predetermined steps in a systematic method allows the researcher to deal with the uncertainties and

changes that come with learning new ideas and new perspectives The focus on the practical elements of research design makes this book an invaluable resource for graduate students writing dissertations Practicing research allows room for experiment error and learning ultimately helping graduate researchers use the literature effectively to build a solid scholarly foundation for their dissertation research project

Early Reading

Instruction Diane McGuinness, 2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000 summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom *School Library Management* Gail K.
