

HR Diagram Worksheet

Background: The Hertzsprung-Russell diagram is actually a graph that illustrates the relationship that exists between the average surface temperature of stars and their absolute magnitude, which is how bright they would appear to be if they were all the same distance away. Rather than speak of the brightness of stars, the term “luminosity” is often used. Luminosity is a measure of how much energy leaves a star in a certain period of time.

Answer the questions using the above HR Diagram

1. What factor affects the color of a star?
2. What factor affects the luminosity of a star?
3. What is the approximate surface temperature of the sun?
4. Is the surface temperature of white dwarf stars higher or lower than red super giants?
