Schnoebelen, 2013-04-17 Model checking is a powerful approach for the formal verification of software When applicable it automatically provides complete proofs of correctness or explains via counter examples why a system is not correct This book provides a basic introduction to this new technique The first part describes in simple terms the theoretical basis of model checking transition systems as a formal model of systems temporal logic as a formal language for behavioral properties and model checking algorithms The second part explains how to write rich and structured temporal logic specifications in practice while the third part surveys some of the major model checkers available **Embedded Systems Development** Alberto Sangiovanni-Vincentelli, Haibo Zeng, Marco Di Natale, Peter Marwedel, 2013-07-19 This book offers readers broad coverage of techniques to model verify and validate the behavior and performance of complex distributed embedded systems The authors attempt to bridge the gap between the three disciplines of model based design real time analysis and model driven development for a better understanding of the ways in which new development flows can be constructed going from system level modeling to the correct and predictable generation of a distributed implementation leveraging current and future research results *Computer Aided Verification* Isil Dillig, Serdar Tasiran, 2019-07-12 This open access two volume set LNCS 11561 and 11562 constitutes the refereed proceedings of the 31st International Conference on Computer Aided Verification CAV 2019 held in New York City USA in July 2019 The 52 full papers presented together with 13 tool papers and 2 case studies were carefully reviewed and selected from 258 submissions The papers were organized in the following topical sections Part I automata and timed systems security and hyperproperties synthesis model checking cyber physical systems and machine learning probabilistic systems runtime techniques dynamical hybrid and reactive systems Part II logics decision procedures and solvers numerical programs verification distributed

systems and networks verification and invariants and concurrency Technical Reports of the National Highway Traffic Safety Administration United States. National Highway Traffic Safety Administration, Lois Flynn, 1978 The Control Data Corporation's Supercomputer Systems Stephen H. Kaisler, 2023-08-09 This book is the ninth volume in the Historical Computing Machines series which aims to document the history of computing machines from the late 1930s up to about 1995. It is the second volume on Control Data computers. It is focused on the Control Data Corporation's supercomputer systems which brought to maturity the design principles espoused by Seymour Cray. Later systems after Cray left CDC continued the development of families of supercomputers through the mid 1990s. CDC developed and sold supercomputers some of the fastest machines for over 25 years for scientific and engineering organizations. CDC's supercomputer systems continued to be minimalist in their instruction sets almost RISC like in some senses. This volume covers CDC supercomputer systems through the demise of CDC as the Cold War ended, describes their system software, their effect on programming language designs and key applications. As such, this volume strives to bring together a comprehensive but not exhaustive view of the capabilities of CDC supercomputer systems Computer Software for Spatial Data Handling: Full geographic information systems, 1980
