

REPLACING THE SPROCKET WHEEL SET OR SPROCKET WHEEL HOLDER

When we talk of replacing the sprocket wheel set we mean the set of sprocket wheels with its sprocket wheel holder which, as already said, is mobile on the Polytek hub unlike the other hubs on the market where it is fixed.

1. Release the wheel lock
2. Manually pull the sprocket wheel set off the free wheel body. The stopper also comes off (photos D and E)
3. Replace as wished (or do the required maintenance)
4. Remove any deposits from the free wheel body housing the sprocket wheel holder
5. Drive the sprocket wheel holder in (with the sprocket wheel set on) rotating it counter-clockwise on its axis while exerting a little pressure until it hits against making the pawls mesh with the rack.
6. Push the stopper, the knurled end outward, against the bearing of the sprocket wheel holder until the spring located inside the stopper releases

N.B.

When mounted the free wheel system has a pre-defined mechanical backlash due to the fact that the stopper is not meant to secure the sprocket wheel holder. It is not before the hub is placed on the frame and tightened that the system can be said to be secured and the existing backlash reduced to the minimum.
