Young People and Uncertain Futures? James Goring,Peter Kelly,2025-08-29 Drawing on Foucault s genealogical ethos and his work on power knowledge subjects this book analyses the ways in which neo liberal education apparatuses in Australia and other high income economies frame the problem of young people and uncertain futures The book critically examines the character of the presents and futures of education training and work and of the planet that have been produced in globalising neo liberal capitalism during the last four decades and which see in the development of young people s enterprise and aspiration the solutions to multiple crises and uncertainties It analyses how and why young people s

behaviours and dispositions have been made knowable in these ways and the limits and possibilities that they produce for understanding what young people must be and become The book draws on post humanist feminist studies of techno science and futures studies to explore the promise of more socially just and sustainable futures for young people A thought provoking study for scholars and students of the sociology of education and of youth and society it will be invaluable for policymakers governments NGOs educators and undergraduate and postgraduate students interested in young people and the crises of capitalism earth systems and the biosphere

experiment 8 ballistic pendulum san José state - Jul 16 2023

web experiment 8 ballistic pendulum objective to use a ballistic pendulum to determine the velocity of a projectile to verify this velocity by measuring the range of the projectile experiment we use measurements obtained from a ballistic pendulum to review energy conservation momentum conservation and projectile motion

14.5 unit 10 lab extension ballistic pendulum - Nov 08 2022

web sep 10 2020 the ballistic pendulum is a device used to determine the speed of objects moving too fast for conventional instruments the basic idea is that a projectile is fired into a pendulum which then swings upward to some height which is measured

27.8 sample lab report measuring g using a pendulum - Feb 28 2022

web abstract in this experiment we measured g by measuring the period of a pendulum of a known length we measured $g = 7.65 \pm 0.378 \text{ m/s}^2$ $g = 7.65 \pm 0.378 \text{ m/s}^2$ this corresponds to a relative difference of 22.22% with the accepted value 9.8 m/s^2 and our result is not consistent with the accepted value

ballistic pendulum new york university - Dec 09 2022

web nov 13 2015 the ballistic pendulum was invented in 1742 to measure the speed of bullets as you can see from this experiment it is not necessary to use a ballistic pendulum to measure the speed of a slowly moving object but the ballistic pendulum does illustrate the use of several important conservation laws in physics 3 equipment
