Immobilised Biocatalysts for Bioremediation of Groundwater and Wastewater Rita Hochstrat,Thomas Wintgens,Philippe Corvini,2015-02-15 The European project MINOTAURUS explored innovative bio processes to eliminate emerging and classic organic pollutants These bio processes are all based on the concept of immobilization of biocatalysts microorganisms and enzymes and encompass bioaugmentation enzyme technology rhizoremediation with halophytes and a bioelectrochemical remediation process The immobilization based technologies are applied as engineered ex situ treatment systems as well as natural systems in situ for the bioremediation of groundwater wastewater and soil The selection and application of tailored physico chemical molecularbiological and ecotoxicological monitoring tools combined with a rational understanding of engineering enzymology and microbial physiology is a pertinent approach to open the black box of the selected technologies Reliable process monitoring constitutes the basis for developing and refining biodegradation kinetics models which in turn improve the predictability of performances to be achieved with technologies Immobilised Biocatalysts for Bioremediation of Groundwater and Wastewater delivers insight into the concepts and performance of a series of remediation approaches A key strength of this book is to deliver results from lab scale through to piloting at different European reference sites It further suggests frameworks for structuring and making evidence based decisions for the most appropriate bioremediation measures

Environmental Emissions Richard Viskup,2021-01-07 Today the issue of environmental emissions is more important than ever before Air pollution with particulates soot carbon

aerosols heavy metals and so on is causing adverse effects on human health as well as the environment This book presents new research and findings related to environmental emissions pollution and future sustainability Written by experts in the field chapters cover such topics as health effects emission monitoring and mitigation and emission composition and measurement **Comprehensive Water Quality and Purification**, 2013-09-24 Comprehensive Water Quality and Purification Four Volume Set provides a rich source of methods for analyzing water to assure its safety from natural and deliberate contaminants including those that are added because of carelessness of human endeavors Human development has great impact on water quality and new contaminants are emerging every day The issues of sampling for water analysis regulatory considerations and forensics in water quality and purity investigations are covered in detail Microbial as well as chemical contaminations from inorganic compounds radionuclides volatile and semivolatile compounds disinfectants herbicides and pharmaceuticals including endocrine disruptors are treated extensively Researchers must be aware of all sources of contamination and know how to prescribe techniques for removing them from our water supply Unlike other works published to date that concentrate on issues of water supply water resource management hydrology and water use by industry this work is more tightly focused on the monitoring and improvement of the quality of existing water supplies and the recovery of wastewater via new and standard separation techniques Using analytical chemistry methods offers remediation advice on pollutants and contaminants in addition to providing the critical identification perspective The players in the global boom of water purification are numerous and varied Having worked extensively in academia and industry the Editor in Chief has been careful about constructing a work for a shared audience and cause **Remediation Engineering** Suthan S. Suthersan, John Horst, Matthew Schnobrich, Nicklaus Welty, Jeff McDonough, 2016-11-25 Remediation engineering has evolved and advanced from the stage of being a sub discipline of environmental engineering into its own engineering discipline supporting the growth of a global industry This fully updated second edition will capture the fundamental advancements that have taken place during the last two decades within the sub disciplines that form the foundation of the remediation engineering platform The book will cover the entire spectrum of current technologies that are being employed in this industry and will also touch on future trends and how practitioners should anticipate and adapt to those needs **Synchrotron-Based Techniques in Soils and Sediments** Balwant Singh, Markus Grafe, 2010-02-18 Over the past 20 years synchrotron based research applications have provided important insight into the geochemical cycling of ions and the chemical and crystallographic properties of minerals in soils and sediments Of particular significance is the understanding of local coordination environments with the use of X ray absorption spectroscopy The high flux and brightness of the X ray beams have allowed researchers to work at environmentally relevant concentrations The use of focusing mirrors and apertures which allow for mapping and trace particle surfaces microbes roots channels and elements at the micron and at a nano meter scale in 2 and 3D have also been a great enhancement to science This book provides the most up to date information on synchrotron based

research applications in the field of soil sediment and earth sciences Invited authors provide chapters on a wide range of research topics including multiphase flow and transport processes physical aspects rhizosphere and microbial life biological aspects and dynamics of C N S P and heavy metals and metalloids chemical aspects In addition perspectives on the impact of synchrotron based applications particularly X ray absorption spectroscopy and the role of synchrotron applications in remediation regulatory and decision making processes are considered Up to date with the latest research results and techniques in synchrotron based techniques Information on specific techniques elements and minerals regulatory and remediation decision making contaminants and the impact of X ray absorption spectroscopy on soil science Internationally recognized leaders in their fields of expertise from Europe North America Asia and Australia *PISA 2018 Assessment and Analytical Framework* OECD,2019-04-26 This report presents the conceptual foundations of the OECD Programme for International Student Assessment PISA now in its seventh cycle of comprehensive and rigorous international surveys of student knowledge skills and well being Like previous cycles the 2018 assessment covered reading mathematics and science with the major focus this cycle on reading literacy plus an evaluation of students global competence their ability to understand and appreciate the perspectives and world views of others Financial literacy was also offered as an optional assessment
