differs from Miller's comprehensive text *LIVING IN THE ENVIRONMENT* 13th Edition because there is much less detail and more integration of topics with a different chapter order. For example, the following topics have been integrated into single chapters: human population dynamics and urban problems are in Chapter 5; nonrenewable and renewable energy resources are in Chapter 6; terrestrial and aquatic biodiversity are in Chapter 7; water resources and water pollution are in Chapter 12; solid and hazardous waste are in Chapter 13; and environmental economics, politics, and worldviews are in Chapter 14. For the first time ever in a Miller textbook, students will receive a CD-ROM entitled *Interactive Concepts in Environmental Science*. This groundbreaking addition integrates nearly 100 engaging animations and interactions with chapter summaries, flashcards, and Web-based quizzes. Organized by chapter, students will find links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves. Miller has remained true to his hallmark features, such as high-quality end-of-chapter questions, an orientation toward prevention rather than clean-up, an integration of Web resources and video, and a balanced presentation of controversial environmental issues.

Simple Solutions for Humanity Patrick Kenji Takahashi, 2008-02-29. Book 1. SIMPLE SOLUTIONS for Planet Earth dealt with energy and the environment. SIMPLE SOLUTIONS for Humanity provides ultimate answers for our society and beyond. Ever wonder if there could ever be a way to end crime and war forever, or the prospects for immortality, or a better educational system, or the reality of extraterrestrial intelligence, or the future of religion? If all the above can be satisfactorily resolved, then just in case there is no afterlife, where is the best place to live on Earth today? Simple solutions, of course, are hardly that. How to end crime? What about three strikes and you're dead? Sure, this should work, but it's not morally rational. The solution to war is incredibly simple. Just read the book and find out how. Scientists are getting very close to determining a way to disarm our aging gene. When will this happen? Our educational system is flawed. Be prepared to be shocked by the Stanford Marshmallow Study. Then find out that our terrible student scores relative to the developed world might not be worth all the anguish. The USA will prevail because of our superiority. In Could the solution for world peace or curing cancer be streaming in from space? The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God. How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF? A Golden Evolution is suggested. Are you one of those who largely wasted your life looking out only for yourself, family, and friends? Could there be a higher calling? You too can make a positive difference. Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity.
