Isabel González-Pueyo, 2009. In the last few years, Information and Communication Technologies (ICTs) have emerged as a transforming element in language teaching and learning and have become an integral part of many courses of English for professional and academic purposes (ESP). This collection brings together contributions from ESP teachers who provide an account of educational experiences involving ICTs and share their practices, successes, failures, and reflections. Most papers in the volume report on blended learning experiences where teachers use either Course Management Systems like WebCT or Moodle or online learning environments created by themselves. The contributions give ideas on how to develop pedagogically sound online language learning materials. Additionally, they discuss issues related to online language pedagogy and promote the development of online learning.
