Neutron Diffraction Irisali Khidirov, 2012-03-14 Now neutron diffraction is widely applied for the research of crystal magnetic structure and internal stress of crystalline materials of various classes including nanocrystals In the present book we make practically short excursion to modern state of neutron diffraction researches of crystal materials of various classes The book contains a helpful information on a modern state of neutron diffraction researches of crystals for the broad specialists interested in studying crystals and purposeful regulation of their service characteristics since the crystal structure basically defines their physical and mechanical properties Some chapters of the book have methodical character that can be useful to scientists interested in possibilities of neutron diffraction We hope that results of last years presented in the book can be a push to new ideas in studying of crystalline magnetic structure and a macrostructure of usual crystal materials and nanocrystals In turn it can promote working out of new materials with new improved service characteristics and to origin of innovative ideas

Integrative Computational Materials Engineering Georg J. Schmitz, Ulrich Prahl, 2012-05-21 Presenting the results of an ambitious project this book summarizes the efforts towards an open web based modular and extendable simulation platform for materials engineering that allows simulations bridging several length scales In so doing it covers processes along the entire value chain and even describes such different classes of materials as metallic alloys and polymers

It comprehensively describes all structural ideas the underlying concepts standard specifications the verification results obtained for different test cases and additionally how to utilize the platform as a user and how to join it as a provider A resource for researchers users and simulation software providers alike the monograph provides an overview of the current status serves as a generic manual for prospective users and offers insights into the inner modular structure of the simulation platform
