

CFA-00000 Explanation

Choice "D" is correct. The present value of future cash flows is used to measure long-term investments or securities, not inventory, because inventory is a short-term asset, which has more immediate cash flows. (SFAC 2 para. 67)

Choice "A" is incorrect. Historical cost can be used to measure inventory because it is a relevant and reliable measurement attribute of current assets such as inventory.

Choice "B" is incorrect. Replacement (or current) cost can be used to measure inventory because it is a relevant and reliable measurement attribute of current assets such as inventory.

Choice "C" is incorrect. Fair marketable value can be used to measure inventory because it is a relevant and reliable measurement attribute of current assets such as inventory.
