**The Living Galaxy** Eugenio Mieli, Andrea Maria Francesco Valli, Claudio Maccone, 2025-02-14. This book describes the possible distribution of life in the Milky Way. Our description is mathematical in order to be extrapolated from what we know that happened on Earth to what might have happened on the huge number of extrasolar planets existing in the Milky Way Galaxy. We use the statistical Drake equation, which identifies parameters for calculating the total number of life forms at all levels. While the original Drake equation (1961) contained seven factors only, we extend the number of factors to 50, thus incorporating much of the scientific knowledge about the Evolution of Life available in 2024. As such, this book aims at being a narrative of a series of events starting with pre-life epochs and extending them into the present and into the future. This book, while well rooted in scientific and mathematical models, depicts the drama of life whether it emerges and thrives or succumbs and vanishes. It's a tale of attempts, defeats, and progress unfolding not along the scale of Human Lifetimes but rather along the scale of Galactic Civilizations, billion years long.

**Creators and Friends** Robert Shapiro, 1998-02-01. Humans, creators in training, have a purpose and destiny so heartwarming, so profoundly glorious that it is almost unbelievable from our present dimensional perspective. Humans are great lightbeings from beyond this creation, gaining experience in dense physicality by slowing down the creative process in order to feel the results and consequences of their decisions and actions. This truth about the great human genetic experiment of the Explorer Race and the mechanics of creation is being revealed for the first time by Zoosh and his friends as humanity begins to awaken to its true nature. Zoosh and a great assortment of beings who have never spoken to the physical plane before, from particles to All That Is, speak vibrantly through superchannel Robert Shapiro. Each personality has its own knowing perception and expertise as it shares its history, its

present focus and the awesome truth about humanity's mission. The books read like adventure stories as we follow the clues from this creation we live in out to the Council of Creators and beyond. As we explore the greater reality beyond our planet, our galaxy, our dimension, our creation, we meet prototypes, designers, shapemakers, creators, creators of creators, and friends of our Creator who explain their roles in this creation and their experiences before and beyond this creation. As our awareness expands about the way creation works, our awareness of who we are expands, and we realize that a part of ourselves is in that vast creation and that we are much greater and more magnificent than even science fiction had led us to believe. Join us in the adventure of discovery. It's mind stretching.

**The Routledge Companion to Big History** Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01. The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history. The volume is divided into five parts, each representing current and evolving areas of interest to the community, including big history's relationship to science, social science, the humanities, and the future, as well as teaching big history and little big histories. Considering an ever-expanding range of theoretical, pedagogical, and research topics, the book addresses such questions as: what is the relationship between big history and scientific research? how are big historians working with philosophers and religious thinkers to help construct meaning? how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms? what is little big history, and how does big history impact on thinking about the future? The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels. A timely collection with contributions from leading proponents in the field, it is the ideal guide for those wanting to engage with the theories and concepts behind big history.

**Government Reports Annual Index**, 1979. *Getting at Jesus* Peter S. Williams, 2019-01-29. Portraying themselves as challenging blind religious dogma with evidence-led skepticism, the neo-atheist movement claims that the New Testament contains unreliable tales about a mythical figure who, far from being the resurrected Lord of life, may not even have lived. This comprehensive critique documents the falsehood of these neo-atheist claims, correcting their historical and philosophical mistakes to show how we can get at the truth about the historical Jesus.
