

E3 Series® Combined Fire and MNS System

Description

The Gamewell-FCI E3 Series® Broadband Emergency Voice Evacuation System and the E3 Series Broadband Networked Fire Alarm System can be combined on the common network to form a combination Fire and Mass Notification (MNS) System in accordance with the NFPA and UL Standard UL2572 requirements. The E3 Series modules, nodes and control panels are peer-to-peer, self-regenerating, token ring passing networks consisting of 2 to 64 nodes, or consisting of up to 122 nodes with the addition of an AHO.

The E3 Series System is a modular design. This adaptable design allows a wide range of configurations to form an integrated, distributed fire alarm system in combination with the audio evacuation for both Fire and Mass Notification functions as desired. The design also allows for its use as a dedicated, standalone Mass Notification System without a fire alarm service.

The network communication conveys all of the following Fire Alarm and Mass Notification control functions:

- Audio evacuation
- Voice paging
- Fire fighter communications over a single pair of wires or fiber-optic cable

A Region contains only one ACU (Autonomous Control Unit), and multiple LOCs (Local Operating Consoles). Speaker circuits cannot be shared by Regions. The individual node types and modules in the E3 Series System family are interconnected to form the ACU and the LOC panels for Mass Notification as well as the following:

- Fire Command
- Control and Detection
- AV Signaling
- Audio functional units within the overall network system
