Director: Andrew Niccol
Screenplay: Andrew Niccol
Starring: Ethan Hawke, Jude Law, Uma Thurman, Gore Vidal
Release date: 20 March 1998
Running time: 106 minutes

Genetics, genetic engineering, determinism, freedom, identity, discrimination

Summary

As soon as Vincent (Ethan Hawke) is born, his DNA is analyzed and his future capabilities are predicted—including the fact that he has a 99% chance of dying of a heart disorder when he is 30 years old. As a result, he is doomed to a life of menial

labor.

However, he is determined to get to Gattaca Space Academy and join space missions. Through his sheer determination—and the use of someone else's very superior DNA which he buys illegally—he manages to achieve his ambition. The film ends with him taking off in a rocket for Titan: he has overcome his genetic limitations and is free.

Advertising Taglines: "How do you hide when you are running from yourself?"
"There is no gene for the human spirit."

Cultural significance

Hardly a week passes without claims by scientists that they have isolated the gene for some particular disease or trait. Increasingly we are told that mental and emotional characteristics can be attributed to our DNA. Insurance companies want to increase genetic testing in order to identify high-risk applicants for life insurance. More and more we are being defined by our genetic make-up. Gattaca explores these issues.

Biographical background

Gattaca is New Zealander Andrew Niccol's second major screenplay and was his debut as a director. He says, "My genes made me do it. I don't know when I first thought of it, but you can open a newspaper today, and I'm certain that you'll read something about a new gene, and it became inescapable for me as a story idea." He had earlier written the screenplay for The Truman Show.

Overview

The film opens with a text from the Bible – Ecclesiastes 7:13 "Consider what God has done: Who can straighten what he has made crooked?" It continues to tell how our civilization may, in the not too distant future, attempt to do this.

This is a world in which women take swabs of their lips to catch the saliva from a potential husband's kiss in order to have the DNA analyzed - to assess their positive and negative attributes. It is a world in which pianists are genetically engineered so that they can play pieces "that can only be played with 12 fingers". It is a world in which police and security checks are carried out by immediate DNA analysis from blood samples.

Vincent, the main character, was conceived by a young couple in love – in the back of a car rather than in a laboratory. Thus he was destined to be a second class citizen along with others born in the same way – and called "faith births" or "degenerates" or "invalids". Within seconds of his birth his DNA was analyzed and
