of Geography Containing a Complete Syllabus of Oral Instruction on the Method of Object Teaching Also Map Exercises
Systematically Arranged for Class Drill This little work is an attempt to present in a practical form a natural and hence
rational method of teaching Geography to children It is believed to embody the views of the most eminent writers on this
subject on both sides of the Atlantic It begins where nature begins with the child s little world of home It leads the pupil with
open senses out from himself and his school room to the surrounding village or city the adjacent fields and woods and by a
series of familiar Object Lessons on the elements of natural scenery there found it seeks to develop those primary ideas
essential to an intelligent study of maps and text books and to furnish the mind with those living units of geographical
knowledge by means of which alone a just conception of other lands and climes can be realized Proceeding from the pupil s
observations of his own neighborhood its hills and dales its rills or river its pond or lake its vegetable and mineral
productions its trees and forests its animals and people its climate and seasons it acquaints him first with his own village city
or township next with his county and then with his State To this point the instruction is entirely oral The character of these
oral lessons is indicated in a Syllabus which is based on the cardinal principle that oral teaching should seek to open the eye
of the mind to discover truth rather than the ear of memory to receive it About the Publisher Forgotten Books publishes
