

# Sizing Chart

To determine the size of your jewelry, you need to know two basic things:

- 1) the wire thickness or "gauge" of your jewelry, usually abbreviated "ga" (see below right)
- 2) the size, meaning either the "length" or the "inside diameter" of your jewelry, measured in fractions of an inch (see below).

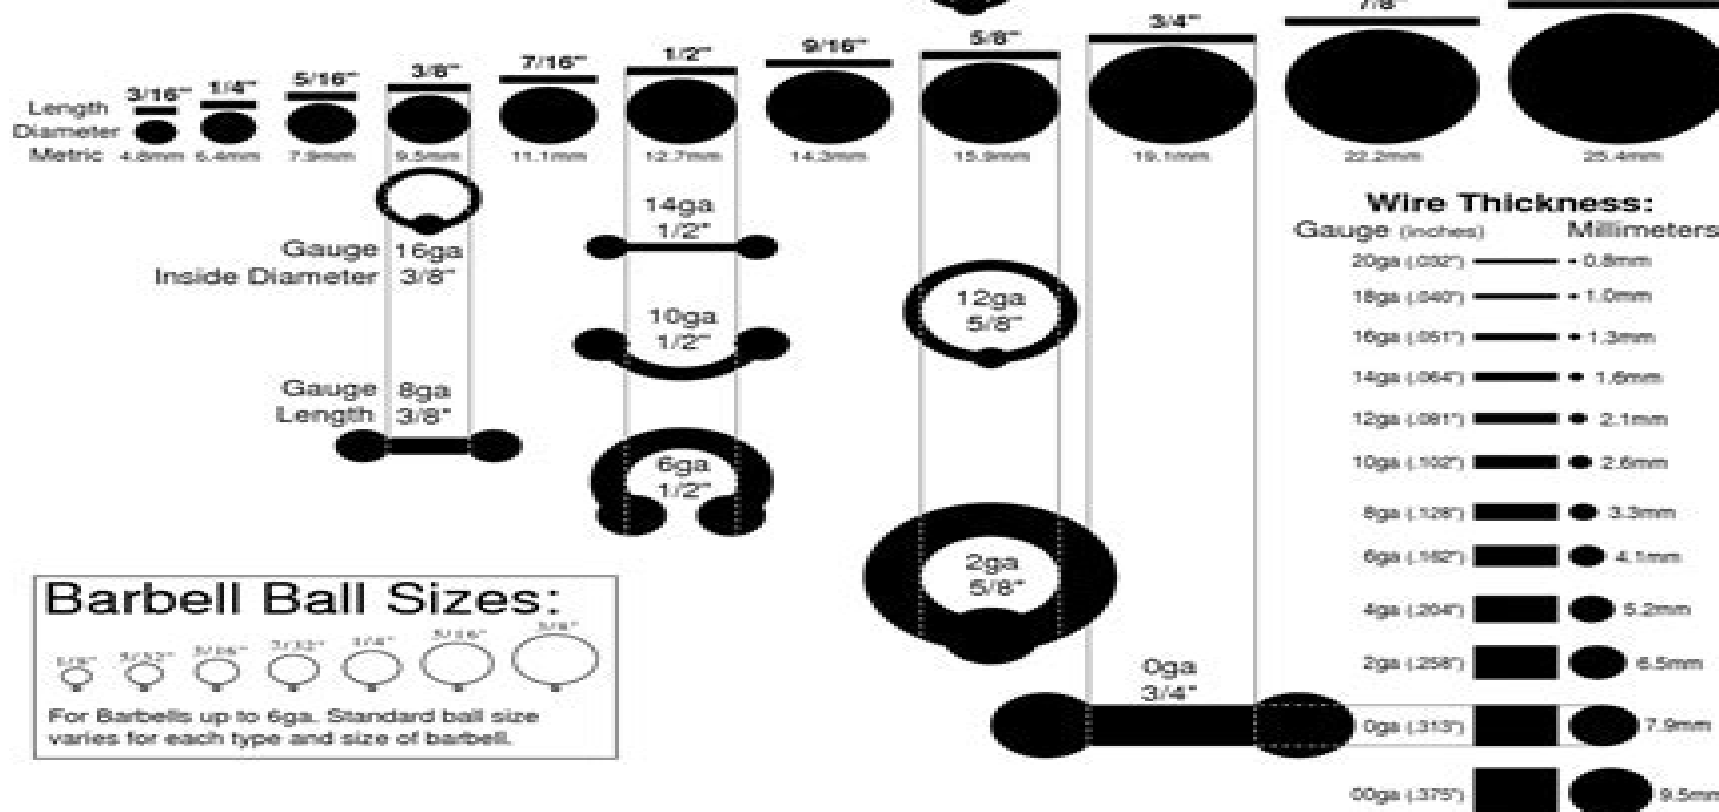

**Length** is the distance between the balls of a barbell.

On a curved barbell the length is the shortest distance between the holes on the end, measured straight across.

**Inside Diameter** is the width of the inside of the ring or circular barbell
