Assessing Children's Mathematical Knowledge Cooper, Barry, Dunne, Mairead, 1999-12-01. This work is highly relevant to the proliferation of accountability measures worldwide. James Scheurich and Douglas Foley. In many countries the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects. In England the majority of the items in such tests have set mathematical tasks in every day situations such as shopping. This requires children to make decisions about whether to use or not their own every day knowledge and experience in their problem solving. Some children are likely to have a better feel for this game than others.

Assessing Children's Mathematical Knowledge draws on the analysis of national curriculum test data from more than 600 children of 10, 11 and 13, 14 years of age as well as in depth interviews with 250 of these as they attempt to solve test problems in order to explore the nature of the difficulties children experience with realistic items. The book shows by comparing test and interview data that many children as a consequence of their confusion over the requirements of realistic test items fail in tests to demonstrate mathematical knowledge and understanding that they actually possess. The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds and across the sexes. The book will be of interest to academics and teachers studying for advanced degrees in mathematics education sociology of education and educational assessment.

Inside the Primary Classroom: 20 Years On Chris Comber, Maurice Galton, Linda Hargreaves, Debbie Wall, 2013-01-11. In recent years primary education has been the subject of continuing debate with questions of standards and their apparent decline being raised with alarming regularity. Central in informing these debates has been the ORACLE study of groupwork in primary classrooms. Published during the 1980s the study described in detail the daily life of the primary classroom the teaching styles used by teachers and the responses of pupils. That research has now been replicated with over two thirds of the schools originally studied being revisited using the same tests and observation instruments. This book presents the findings of this second round of research and is therefore unique in being able authoritatively to document the changes or lack of them in primary education and teaching practice over the last twenty years.
