Superintendent of Documents, 1939 **U.S. Army Vehicle Markings, 1944** Jean Bouchery, Philippe Charbonnier, 2019-06-28 An illustrated guide to the markings used on WWII Era U S Army tanks lorries and Jeeps an invaluable reference for historians modelers and collectors The markings of a 1944 U S Army Jeep are an iconic image of American military and the Second World War But few people know what the distinctive white letters numbers and symbols actually mean This uniquely detailed guide explains how these and other markings were integral to organizing the U S Army on the move U S Army Vehicle Markings 1944 covers all the markings

used on American military vehicles to denote their unit and classification. It also covers tactical markings and the debarkation codes used in the Normandy landings. Hundreds of contemporary photographs are paired with precise color diagrams to show exactly how markings appeared on vehicles including the exact measurements. Mitzel, 2025-06-06. In January 1943 and as World War II entered its second year it was evident that U S tanks were outgunned under armored and underpowered. In short they weren't cutting the mustard but there was no time for a long development project. At Fort Knox Kentucky the newly formed 781st Tank Battalion was detailed to run an around the clock marathon comparison test on forty Sherman tanks to find the best available configuration and fastest solution. When the results of the Million Dollar Tank Test were collected what resulted was the Sherman Easy Eight an easier to manufacture tank that was also such an effective fighting vehicle that it would serve for another thirty years. The 781st Tank Battalion shipped out to Europe where equipped with the Easy Eight it thwarted Hitler's last major offensive in the West Operation Nordwind and swept southern Germany as the tip of the U S Seventh Army's sword. **Index of Technical Publications** United States. These photos are high quality and many focus on specific components further enhancing the value of this book for modelers. *Armorama* Developed in response to the 1899 Hague Convention the 37 mm gun met the restrictions on the size of weapons that could fire explosive shells yet was also light and lethal enough to be used in battle. After World War I in which the French Model 1916 37 mm was used extensively several countries developed or adopted the 37 mm gun. Behind in their development of an antitank gun the United States relied on the German Pak 36 37 mm design as a basis for development. By the mid 1930s the US Ordnance Department designed the M3 37 mm gun and M4 carriage resulting in a towed antitank gun the first antitank gun in the US Army. This gun proved effective at the beginning of World War II but as German armor protection increased it could not penetrate the frontal armor of many German tanks and was relegated to lesser roles. However the gun proved effective against the Japanese tanks and Japanese strong points in the Far East. The US military used the gun on several production and experimental armored vehicles including the M3 Lee Medium Tank the M3 Stuart Light Tank the M5 Stuart Light Tank the M8 Armored Car the T17E1 Staghound Armored Car and the M3A1E3 Scout Car. The gun was also used on several non armored vehicles the P39 Aeracobra and selected naval vessels. Despite its small size the US M3 37 mm gun served throughout the war on many vehicles and performed exactly as designed. Fully illustrated this is the first complete account of the development and use of the US 37 mm gun in World War II.
