

### AGC Time Constant Selection

As supplied from the factory, the AGC (automatic gain control voltage for the receiver) is set for slow decay in SSB and AM modes, and fast decay in CW and FM. If desired, you can change this for slow decay in all modes, by moving switch S01 from position 1 to position 2, as shown below.

### Optional FM Unit Installation

The optional FM Unit can be installed in the 11-pin jack shown in the photo above, with the component side of the board facing to the left.

### Tx Control for FC-757AT & FL-7000

When the FT-747GX is installed with the FC-757AT Automatic Antenna Tuner or the FL-7000 Automatic Linear Amplifier, the external device needs to be able to inhibit transmission by the FT-747GX during band changing, and to control receive-to-transmit switching lines. This can be done by setting switch S02 to position (1) as shown in the diagram below. However, when used without the FC-757AT or FL-7000, this switch MUST be in position (2) to enable transmission.
