**Managing Security Issues and the Hidden Dangers of Wearable Technologies** Marrington, Andrew, Kerr, Don, Gammack, John, 2016-08-26 Advances in mobile computing have provided numerous innovations that make people's daily lives easier and more convenient. However, as technology becomes more ubiquitous, corresponding risks increase as well. *Managing Security Issues and the Hidden Dangers of Wearable Technologies* examines the positive and negative ramifications of emerging wearable devices and their potential threats to individuals as well as organizations. Highlighting socio-ethical issues, policy implementation, and appropriate usage, this book is a pivotal reference source for professionals, policy makers, academics, managers, and students interested in the security and privacy implications of wearable digital devices.

**Contemporary Consumer Health Informatics** Nilmini Wickramasinghe, Indrit Troshani, Joseph Tan, 2016-03-21 This innovative reference examines how consumer health informatics (CHI) can transform healthcare systems stressed by staffing shortages and budget constraints and challenged by patients taking a more active role in their care. It situates CHI as vital to upgrading healthcare service delivery, detailing the relationship between health information technologies and quality healthcare and outlining what stakeholders need to learn for health IT systems to function effectively. Wide-ranging content identifies critical issues and answers key questions at the consumer, practitioner, administration, and staff levels using examples from diverse conditions, countries, technologies, and specialties. In this framework, the benefits of CHI are seen across service domains from individual patients and consumers to healthcare systems and global health entities. Included in the coverage: Use of video technology in an aged care environment; A context-aware remote health monitoring service for improved patient care; Accessibility issues in interoperable sharing of electronic health records; physician's perspective; Managing gestational diabetes with mobile web-based reporting of glucose readings; An organizing vision perspective for developing and adopting e-health solutions; An ontology of consumer health informatics. *Contemporary Consumer Health Informatics* combines blueprint and idea book for public health and health informatics students, healthcare professionals, physicians, medical administrators, managers, and IT practitioners.

**Mathematical Modeling for Intelligent Systems** Mukesh Kumar Awasthi, Ravi Tomar, Maanak Gupta, 2022-07-29 *Mathematical Modeling for Intelligent Systems: Theory, Methods, and Simulation* aims to provide a reference for the applications of mathematical modeling using intelligent techniques in various unique industry problems in the era of Industry 4.0. Providing a thorough introduction to the field of soft computing techniques, this book covers every major technique in artificial intelligence in a clear and practical style. It also highlights current research and applications, addresses issues encountered in the development of applied systems, and describes a wide range of intelligent systems techniques, including neural networks, fuzzy logic, evolutionary strategy, and genetic algorithms. This book demonstrates concepts through simulation examples and practical experimental results. **Key Features:** Offers a well-balanced mathematical analysis of modeling physical systems; Summarizes basic principles in differential geometry and

convex analysis as needed Covers a wide range of industrial and social applications and bridges the gap between core theory and costly experiments through simulations and modeling Focuses on manifold ranging from stability of fluid flows nanofluids drug delivery and security of image data to pandemic modeling etc This book is primarily aimed at advanced undergraduates and postgraduate students studying computer science mathematics and statistics Researchers and professionals will also find this book useful
