Management Information Systems James A. O'Brien,1993 **Classrooms for Distance Teaching & Learning** Michael Hegarty,Anne Phelan,Lisa Kilbride,1998 Interactive classrooms for distance teaching and learning are part of a new revolution in education They allow teachers students and institutions to be linked together in a powerful network so that information can be transmitted rapidly to where it is needed thereby maimising the use of teaching resources Importantly they also offer remote students a telepresence the feeling of being present in a classroom with a teacher and other students for intellectual and social interaction during the teaching and learning process This handbook provides a step by step guide to setting up a classroom for telepresence learning Its comprehensivecoverage includes chapters on testing it works guidelines for the full range of users together with troubleshooting and reference sections There are also detailed case studies of the five distinctive learning scenarios developed by the handbook s pan European authors which include sites for teaching remote learners remote and local learners group presentation and interaction a single learner and a learning centre group The handbook is a BLUEPRINT to be read cover to cover or dipped into for specific information as you strive to set up or fine tune your own version of an interactive classroom for distance teaching and learning *Combining Experimentation and Theory* Enric Trillas,Piero P. Bonissone,Luis Magdalena,Janusz Kacprzyk,2012-01-10 The unexpected and premature passing away of Professor Ebrahim H Abe Mamdani on January 22 2010 was a big shock to the scientific community to all his friends and colleagues around the world and to his close relatives Professor Mamdani was a remarkable figure in the academic world as he contributed to so many areas of science and technology Of great relevance are his latest thoughts and ideas on the study of language and its handling by computers The fuzzy logic community is particularly indebted to Abe Mamdani 1941 2010 who in 1975 in his famous paper An Experiment in Linguistic Synthesis with a Fuzzy Logic Controller jointly written with his student Sedrak Assilian introduced the novel idea of fuzzy control This was an elegant engineering approach to the modeling and control of complex processes for which mathematical models were unknown or too difficult to build yet they could effectively and efficiently be controlled by human operators This ground breaking idea has found innumerable applications and can be considered as one of the main factors for the proliferation and adoption of fuzzy logic technology Professor Mamdani s own life and vital experience are illustrative of his never surrendering attitude while facing adversaries which is normal for a person proposing any novel solution and represent a great example for everybody His subtle sense of humor his joy for life and his will to critically help people especially young people were characteristics deeply appreciated by all the people who enjoyed and benefited from his friendship and advice This book constitutes a posthumous homage to Abe Mamdani It is a collection of original papers related in some way to his works ideas and vision and especially written by

researchers directly acquainted with him or with his work The underlying goal of this book will be fulfilled if in the very spirit of Mamdani s legacy the papers will trigger ascientific or philosophical debate on the issues covered or contribute to a cross fertilization of ideas in the various fields **Sustainability and Global Challenges** John N. Mordeson, Sunil

Mathew, 2024-06-24 This book focuses on the relationship between Artificial Intelligence AI and the Sustainable Development Goals SDGs One of the most important issues the world is facing is sustainability All members of the United Nations adopted Agenda 2030 and the Sustainable Development Goals Associated with the SDGs are many serious global problems These problems include climate change global poverty global hunger human trafficking homelessness biodiversity extinction and terrorism The author s purpose is to develop a textbook concerning the SDGs and how they relate to these problems A recent issue has emerged That is Artificial Intelligence AI has tremendous potential to do both good and harm The book is designed in such a way that it can be used as an undergraduate textbook on sustainability Consequently the mathematics involved is kept at a reasonable level One of the author s goals is to prepare the reader to further their study of global issues In particular to provide them the background needed to examine the three books in the Springer Series Studies in Systems Decision and Control volumes 299 353 and 391 Exercises are provided in the text as well as an instructor s manual Some topics examined in the book include country achievement of the SDGs the relationship between human trafficking and the SDGs climate change and global problems mentioned above
