Readings in Formal Epistemology Horacio Arló-Costa, Vincent F. Hendricks, Johan van Benthem, 2016-06-07 This volume presents 38 classic texts in formal epistemology and strengthens the ties between research into this area of philosophy and its neighbouring intellectual disciplines The editors provide introductions to five subsections Bayesian Epistemology Belief Change Decision Theory Interactive Epistemology and Epistemic Logic Formal epistemology is a term coined in the late 1990s for a new constellation of interests in philosophy the origins of which are found in earlier works of epistemologists philosophers of science and logicians It addresses a growing agenda of problems concerning knowledge belief certainty rationality deliberation decision strategy action and agent interaction and it does so using methods from logic probability computability decision and game theory The volume also includes a thorough index and suggestions for further reading and thus offers a complete teaching and research package for students as well as research scholars of formal epistemology philosophy logic computer science theoretical economics and cognitive psychology [The Formation of the Biblical Canon: Volume 2](#) Lee Martin McDonald, 2017-01-26 Lee Martin McDonald provides a magisterial overview of the development of the biblical canon the emergence of the list of individual texts that constitutes the Christian bible In these two volumes in sum more than double the length of his previous works McDonald presents his most in depth overview to date McDonald shows students and researchers how the list of texts that constitute the bible was once far more fluid than it is today and guides readers through the minefield of different texts different versions and the different lists of texts considered canonical that abounded in antiquity Questions of the origin and transmission of texts are introduced as well as consideration of innovations in the presentation of texts collections of documents archaeological finds and Church councils In the first volume McDonald reexamines issues of canon formation once considered settled and sets the range of texts that make up the Hebrew Bible or Old Testament in their broader context Each individual text is discussed as are the cultural political and historical situations surrounding them This second volume considers the New Testament and the range of so called apocryphal gospels that were written in early centuries and used by many Christian groups before the canon was closed Also included are comprehensive appendices which show various canon lists for both Old and New Testaments and for the bible as a whole *Lincoln and Citizens' Rights in Civil War Missouri* Dennis K. Boman, 2011 During the Civil War the state of Missouri presented President Abraham Lincoln United States military commanders and state officials with an array of complex and difficult problems Although Missouri did not secede a large minority of residents owned slaves sympathized with secession or favored the Confederacy Many residents joined a Confederate state militia became pro Confederate

guerrillas or helped the cause of the South in some subversive manner In order to subdue such disloyalty Lincoln supported Missouri's provisional Unionist government by ordering troops into the state and approving an array of measures that ultimately infringed on the civil liberties of residents In this thorough investigation of these policies Dennis K Boman reveals the difficulties that the president military officials and state authorities faced in trying to curb traitorous activity while upholding the spirit of the United States Constitution Boman explains that despite Lincoln's desire to disentangle himself from Missouri policy matters he was never able to do so Lincoln's challenge in Missouri continued even after the United States Army defeated the state's Confederate militia Attention quickly turned to preventing Confederate guerrillas from attacking Missouri's railway system and from ruthlessly murdering pillaging and terrorizing loyal inhabitants Eventually military officials established tribunals to prosecute captured insurgents In his role as commander in chief Lincoln oversaw these tribunals and worked with Missouri governor Hamilton R Gamble in establishing additional policies to repress acts of subversion while simultaneously protecting constitutional rights an incredibly difficult balancing act For example while supporting the suppression of disloyal newspapers and the arrest of persons suspected of aiding the enemy Lincoln repealed orders violating property rights when they conflicted with federal law While mitigating the severity of sentences handed down by military courts Boman shows Lincoln advocated requiring voters and officeholders to take loyalty oaths and countenanced the summary execution of guerrillas captured with weapons in the field One of the first books to explore Lincoln's role in dealing with an extensive guerrilla insurgency Lincoln and Citizens Rights in Civil War Missouri illustrates the difficulty of suppressing dissent while upholding the Constitution a feat as complicated during the Civil War as it is for the War on Terror

Risk and Rationality Lara Buchak,2013-11-28 Lara Buchak sets out an original account of the principles that govern rational decision making in the face of risk A distinctive feature of these decisions is that individuals are forced to consider how their choices will turn out under various circumstances and decide how to trade off the possibility that a choice will turn out well against the possibility that it will turn out poorly The orthodox view is that there is only one acceptable way to do this rational individuals must maximize expected utility Buchak's contention however is that the orthodox theory expected utility theory dictates an overly narrow way in which considerations about risk can play a role in an individual's choices Combining research from economics and philosophy she argues for an alternative more permissive theory of decision making one that allows individuals to pay special attention to the worst case or best case scenario among other global features of gambles This theory risk weighted expected utility theory better captures the preferences of actual decision makers Furthermore it isolates the distinct roles that beliefs desires and risk attitudes play in decision making Finally contra the orthodox view Buchak argues that decision makers whose preferences can be captured by risk weighted expected utility theory are rational Thus Risk and Rationality is in many ways a vindication of the ordinary decision maker particularly his or her attitude towards risk from the point of view of even ideal rationality

The Epistles for All Christians David Smith,2020-09-25 In The Epistles for All Christians David

Smith argues that epistolary literature offers analogous evidence of circulation to the Gospels Since Richard Bauckham s edited volume The Gospels for All Christians was published in 1998 debate over the validity of the contributors claims that the Gospels were written for all Christians has revolved around interpretation Smith brings circulation to bear on the conversation Studying ancient media practices of publication and circulation and using social network theory Smith makes a compelling case that if the evangelists did not expect their texts to circulate they would be atypical **Moody's Analyses of**
