Teaching Mathematics Using Popular Culture Elana Reiser, 2015-10-29 Mathematics teachers often struggle to motivate their students One way to cultivate and maintain student interest is for teachers to incorporate popular media into their methodology Organized on the subject strands of the Common Core this book explores math concepts featured in contemporary films and television shows and offers numerous examples high school math teachers can use to design lessons using pop culture references Outlines for lessons are provided along with background stories and historical references

Space Law Francis Lyall, Paul B. Larsen, 2016-04-01 The opening of space to exploration and use has had profound effects on society Remote sensing by satellite has improved meteorology land use and the monitoring of the environment Satellite television immediately informs us visually of events in formerly remote locations as well as providing many entertainment channels World telecommunication facilities have been revolutionised Global positioning has improved transport This book examines the varied elements of public law that lie behind and regulate the use of space It also makes suggestions for the development and improvement of the law particularly as private enterprise plays an increasing role in space

Commercial and Military Uses of Outer Space Melissa de Zwart, Stacey Henderson, 2021-02-25 This edited book brings together a diverse range of chapters on space related topics The authors included in this book are drawn from Australia and overseas from academia government industry civil society and the military This book contains chapters that cover topics such as law science archaeology defence policy and more all with a focus on space This edited collection is a timely international and interdisciplinary book which addresses some of the contemporary issues facing activities in space and those attempting to understand use and regulate the space domain This edited book seeks to normalise the role of women as experts in the space sector by not calling attention to the fact that all the authors are women they are all experts in their respective fields who just happen to be women Bringing together these contributions in this book in turn promotes the inclusion of diversity in the space sector This edited collection is an opportunity to influence the development of the space industry in terms of gender diversity and diversity of disciplines and thinking while it is in its formative stage rather than trying to redress imbalances once they are entrenched in the industry

Raymond, Christopher T. Russell, 2022-03-31 The NASA Dawn mission launched in 2007 aimed to visit two of the most massive protoplanets of the main asteroid belt Vesta and Ceres The aim was to further our understanding of the earliest days of the Solar System and compare the two bodies to better understand their formation and evolution This book summarises state of the art results from the mission and discusses the implications for our understanding not only of the asteroid belt but the entire Solar System It comprises of three parts Part 1 provides an overview of the main belt asteroids and provides an introduction to the Dawn mission Part 2 presents key findings from the mission and Part 3 discusses how these findings provide insights into the formation and evolution of the Solar System This is a definitive reference for academic researchers and professionals of planetary science asteroid science and space exploration *Gender and the Race for Space* Erinn

McComb, 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a distinctly American anti communist masculinity which appeared on the surface anyway to resolve not only an American crisis of masculinity but helped win the Cold War on an ideological and popular level This American image focused on strict gender binaries of man as the protector controlling technology and containing communism while woman was the passive actor with spaceflight technology left behind in the home waiting for the return of the astronaut husband Allowing women to fly into space would have represented a lack of individual control with spaceflight technology Environmental Law Across Cultures Kirk W. Junker, 2019-12-09 This book provides a practical functional comparison among various institutions tools implementation practices and norms in environmental law across legal cultures This is a new approach that focuses on the act of comparison looking at legal practice from the ground up including the perspective of citizens Most literature on

comparative environmental law either focuses on a two way comparison of state jurisdictions or simply juxtaposes environmental features of two or more state jurisdictions without engaging in any analysis of the comparison. However, this book treats legal cultures as the objects of comparison as it provides practical comparisons among various institutions, tools and norms in environmental law. The arrangement and organisation of the material reverses the more traditional presentation of comparative environmental law as a series of countries within which separate descriptions are respectively presented. In this book, the reader is presented with environmental legal themes with examples and case studies drawn from various cultures that are compared in order to help understand the theme. Case studies draw on the authors' experiences in a range of legal cultures including Australia, Brazil, China, Chile, Ethiopia, Germany, India, Nigeria, Slovakia and the USA. The comparative nature of the book allows domestic professionals to develop skills to enable them to understand and advocate broader contexts for clients and helps students become more aware of specific legal systems while questioning why their own system functions or does not function as it does. The book is aimed at advanced undergraduate and postgraduate students of environmental law as well as researchers and practitioners.

Addictions Counseling Today Kevin Alderson, 2019-12-03

South African Language Rights Monitor 2011 / Suid-Afrikaanse Taalregte-monitor 2011 Johan Lubbe, Theodorus du Plessis, 2016-01-05

The SALRM 2011 provides a rich source of information on a range of language related subjects. A prominent issue remains the changing of street and place names including the Pretoria Tshwane and Louis Trichardt Makhado sagas. Language in education remains a thorny issue as medium of instruction at school and tertiary level and the proposal that passing an African language should be a requirement in order to obtain a tertiary degree in South Africa. In terms of language legislation, the draft version of the National Language Act was proposed. The language of record in courts also received attention in the media.

The Newcom++ Vision Book Sergio Benedetto, Marco Luise, Luis M. Correia, 2012-04-07

The Book contains the Vision of the researchers of the European Network of Excellence NEWCOM Network of Excellence on Wireless COMMunication on the present and future status of Wireless Communication Networks. In its content, the community of NEWCOM researchers shaped under the common ground of a mainly academic network of excellence have distilled their scientific wisdom in a number of areas characterized by the common denominator of wireless communications by identifying the medium long term research tendencies, problems, describing the tools to face them and providing a relatively large number of references for the interested reader. The identified areas and the researchers involved in their redaction reflect the intersection of the major topics in wireless communications with those that are deeply investigated in NEWCOM. They are preceded by an original description of the main trends in user society needs and the degree of fulfilment that ongoing and future wireless communications standards will more likely help achieving. The appendix

of the Book contains a list of Millenium Problems seminal problems in the area of wireless communication networks characterized by being crucial and still unsolved The problems have been identified by NEWCOM researchers and filtered by the editors of the Vision Book

Human Uses of Outer Space Melissa de Zwart, Stacey Henderson, John Culton, Deborah Turnbull, Amit Srivastava, 2023-01-25 This book takes a unique interdisciplinary approach to the planned return of humans to the Moon With the Artemis Project the US and its partners have planned an ambitious project with the creation of the Lunar Gateway to be followed by the landing of the first woman and next man on the Moon This book explains that the Artemis project then forms the basis of planned sustained human missions to Mars Russia and China have also announced their intentions to establish a permanent base on the Moon and have commenced the deployment of modules which will form part of this project This book states that whilst there has been a permanent human presence in Low Earth Orbit since 2000 with the continued crew rotation on the International Space Station perhaps the most successful international collaboration of modern times the establishment of a base on the Moon will generate new challenges for human survival and success The continued human presence on the space station has provided an incredible opportunity to observe and study the effect of being in space upon the human body and the human psyche In addition this book explores that it has provided the scope and context for a vast range of scientific experiments Now that it has become likely that more humans will need to live and work in space for sustained periods of time it is essential that we consider matters beyond the engineering questions of how we go to space to the broader questions of how we will live there What will we need What will the effects of sustained living in space be for us emotionally cognitively physically and how do we need to consider the impact we will have on the environment to which we are travelling This book is unique in that not only does it bring together a diverse yet complementary set of expertise but it also consciously brings those different experts together in jointly authored chapters mirroring the way we will have to work together as teams of diverse experts in space It creates interwoven chapters co written by various teams of psychologists lawyers engineers regulators policy experts architects and cultural studies experts This book will enable the fielding and addressing of the difficult questions that need to be considered before space habitation may be a successful and sustained mode of existence This book fills a gap in the area of space studies which tends to focus on narrow discipline specific issues It provides a thought provoking launchpad for further work in this area and above all stresses the needs of the human in a hostile environment
