

Determine the child's facial characteristics by having each parent flip a coin.

Heads = child will inherit the first allele (i.e. B or N1) in a pair

Tails = child will inherit the second allele (i.e. b or N2) in a pair

On the data sheet, circle the allele that the parent will pass on to the child and write the child's genotype.

Using the information in this guide, look up and record the child's phenotype and draw that section of the face where indicated on the data sheet. Some traits follow special conditions, which are explained in the guide. When the data sheet is completed, draw your child's portrait as he/she would look as a teenager. You must include the traits as determined by the coin tossing. Write your child's full name on the portrait.
