Exploring World History through Geography Julie Crea Dunbar, 2022-09-29 Not your run-of-the-mill world history tome, this book takes readers on a fascinating journey through time to examine world history through the closely related discipline of geography. From the early civilizations of ancient Mesopotamia to our present-day globalized society, readers will learn how humans interacted and still interact with the environment around them, as well as the environment's role in not only shaping the society's world view but enabling the building of socially stratified and successful civilizations. Additionally, the book examines how civilizations interacted with others, from developing cross-boundary trade to initiating wars of expansion. Finally, readers will also understand the impact of the study and application of geography, such as the creation and use of maps and the study of cultures and Earth's processes. Readers will come away with a new understanding of the relevance of geography to not only human history but contemporary events as well as their day-to-day lives. By presenting this history from a slightly different geographic point of view, this book will inspire fresh curiosity in the world, both past and present.

propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph

Talbert, 2014-02-14 Ancient Perspectives encompasses a vast arc of space and time Western Asia to North Africa and Europe from the third millennium BCE to the fifth century CE to explore mapmaking and worldviews in the ancient civilizations of Mesopotamia Egypt Greece and Rome In each society maps served as critical economic political and personal tools but there was little consistency in how and why they were made Much like today maps in antiquity meant very different things to different people Ancient Perspectives presents an ambitious fresh overview of cartography and its uses The seven chapters range from broad based analyses of mapping in Mesopotamia and Egypt to a close focus on Ptolemy s ideas for drawing a world map based on the theories of his Greek predecessors at Alexandria The remarkable accuracy of Mesopotamian city plans is revealed as is the creation of maps by Romans to support the proud claim that their emperor s rule was global in its reach By probing the instruments and techniques of both Greek and Roman surveyors one chapter seeks to uncover how their extraordinary
