

## **Journal Article Summary**

Summarizing research articles will help you to develop your critical thinking skills and ability to express yourself in the written form. Here are some practical hints on how to summarize a research article. A research article is written to get across a lot of information quickly to a reader. Reading such articles can be tedious and sometimes frustrating unless you are familiar with scientific writing and the reasons for this style. Research articles are highly structured to make information easy to find. Unlike literary writing, scientific writing conveys quantifiable information; as a result, the writing is very lean and extra words are avoided.

A research article has the following major sections: **Title Page, Abstract, Introduction, Method, Results, Discussion, References, Tables and Figures.** *An article summary highlights the information in the Introduction, Methods, Results, and Discussion.* Before you can write such a summary, you need to read and understand the article.

### **Reading the Article**

- ➤ *Allow enough time.* Plan to spend at least one half of the time you devote to this assignment to reading and understanding the article. Before you can write about research, you have to evaluate it. Before you can evaluate it, you have to understand it. Before you understand it, you have to digest it. Before you can digest, you have to read it, thoroughly. This takes more time than most students realize.
- ➤ *Scan the article first.* You will get bogged down in detail if you try to read a new article from start to finish. Initially you should briefly look at each section to identify:
  - general information about the study (stated in the Abstract and Introduction)
  - the hypothesis (-es) or research questions (in the Introduction)
  - the test of the hypothesis, including the sample, variables and operational definitions and the procedures used (in the Methods)
  - the findings (in the Results, including tables and figures)
  - how the findings were interpreted (in the Discussion).

Underline key sentences or write the key point (hypothesis, design, etc.) of each paragraph in the margin. It may also be helpful to write down these key points on a summary sheet as you come across them.
