Global science education is a reality at the end of the 20th century albeit an uneven reality because of tremendous technological and economic pressures Unfortunately this reality is rarely examined in the light of what interests the everyday lives of ordinary people rather than the lives of political and economic elites The purpose of this book is to offer insightful and thought provoking commentary on both realities The tacit question throughout the book is Whose interests are being served by current science education practices and policies The various chapters offer critical analysis from the perspectives of culture economics epistemology equity gender language and religion in an effort to promote a reflective science education that takes place within rather than taking over the important cultural lives of people The target audience for the book includes graduate students in education science education and education policy professors policy and government officials involved with education      *When the Past Is Always Present* Ronald A. Ruden,2011-01-19

*When the Past Is Always Present* Emotional Traumatization Causes and Cures introduces several new ideas about trauma and trauma treatment The first of these is that another way to treat disorders arising from the mind brain may be to use the senses This idea which is at the core of psychosensory therapy forms what the author considers the third pillar of trauma treatment the first and second pillars being psychotherapy and psychopharmacology Psychosensory therapy postulates that sensory input for example touch creates extrasensory activity that alters brain function and the way we respond to stimuli The second idea presented in this book is that traumatization is encoded in the amygdala only under special circumstances Thus by understanding what makes an individual resistant to traumatization we can offer a way of preventing it The third idea is that traumatization occurs because we cannot find a haven during the event This is the cornerstone of havening the particular form of psychosensory therapy described in the book Using evolutionary biological principles and recently published neuroscientific studies this book outlines in detail how havening touch de links the emotional experience from a trauma essentially making it just an ordinary memory Once done the event no longer causes distress
