**The Future of Liberal Education** Timothy Burns, Peter Lawler, 2016-04-14 Liberal Education once the whole of American Higher Education has been displaced by technical training and career oriented majors But it has also suffered from the decline in genuine liberal learning found in humanities disciplines owing to specialization politicization and the adoption of new literary and psychological theories The social sciences too have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education In this compelling volume thirteen college educators describe in sparkling prose what liberal education is its place in a liberal democracy the very serious challenges it faces in the 21st century even from some of its alleged friends and why it is important to sustain and expand liberal education's place in American colleges and universities Proponents and critics of liberal education alike will benefit from these insightful essays This book was originally published as a special issue of Perspectives on Political Science

**Decentralized Governance and Accountability** Jonathan A. Rodden, Erik Wibbels, 2019-02-28 At the end of the twentieth century academics and policymakers welcomed a trend toward fiscal and political decentralization as part of a potential solution for slow economic growth and poor performance by insulated unaccountable governments For the last two decades researchers have been trying to answer a series of vexing questions about the political economy of multi layered governance Much of the best recent research on decentralization has come from close collaborations between university researchers and international aid institutions As the volume and quality of this collaborative research have increased in recent decades the time has come to review the lessons from this literature and apply them to debates about future programming In this volume the contributors place this research in the broader history of engagement between aid institutions and academics particularly in the area of decentralized governance and outline the challenges and opportunities to link evidence and policy action
