Introduction **The Annual Condition of Education Report**, 2011 Report Card Nation Charles E. Smith, 2025-04-28 In Report Card Nation Charles E. Smith offers an insider's perspective on a pivotal moment in American education reform In 2003 under the mandate of President George W. Bush's No Child Left Behind initiative Smith and a team of public servants brought the National Assessment of Educational Progress (NAEP) also known as the Nation's Report Card to the forefront of federal education policy Once a respected but relatively obscure measure the NAEP quickly became the primary tool for assessing the successes and failures of public education across the country Smith's account details the complexities of implementing a national assessment program with far reaching consequences under intense political scrutiny As the Nation's Report Card became a centerpiece of federal accountability measures its impact reverberated throughout the educational landscape While the reforms led to budgetary windfalls and documented successes in some areas they also exposed deep divides particularly in urban school districts where standardized testing policies contributed to school closures and increased private school enrollments Drawing on his thirty two years in Tennessee state government and six years as executive director of the National Assessment Governing Board Smith explores both the promises and the pitfalls of the No Child Left Behind era He provides readers with an honest behind the scenes account of the shifts in American education policy during this transformative decade including the groundwork for implementation of Common Core standards Smith's clear eyed well researched narrative provides an essential look at how national policy shaped local realities and how one of the most controversial periods in public education still reverberates today Education Reform in the American States Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01 Education Reform in the American States is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from
