The issues raised by the role of language in education are some of the most important and contentious faced by education systems across the globe. Language is embedded in the concepts of nationhood and identity and is therefore directly linked to the very social and political fabric of a country. In a climate of increasing globalisation, development and mobility of populations, nations around the world are concerned with the tension between cultivating a sense of cultural and linguistic cohesion and making use of the linguistic diversity that exists in every country and region. This book examines the implications and impacts, the dilemmas and potential for language education in relation to education systems and wider society. Split into three key parts, it considers current issues in language education including the role of language in maintaining power and inequalities, in encouraging participation and inclusion, and in challenging the status quo. Different approaches to language education around the world, the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected *World Yearbook of Education* continues the tradition of offering a wide range of international perspectives from leading commentators on a universal concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world.

Do you possess freedom, the will to do as you choose as an individual, as a participant in social affairs or as a citizen in the political realm? Well, no. Not really. At least not as most of us understand a term loaded down with metaphysical baggage. Don't worry. You've got something better: a neurological system capable of carrying out the most complex analytical and computational tasks, membership in innumerable communities that provide you with huge stores of knowledge and wisdom, and a politico-constitutional order that ought to provide the material and the immaterial conditions that will enable you to pursue a life worth valuing. Drop the simplistic folk psychology of unfettered freedom whilst holding on to intentionality, and you might be inclined to adopt a set of social practices and political arrangements that enhance the chances that you and your compatriots will flourish. As many recent studies of consciousness reveal, our neurological systems are complex feedback mechanisms designed to create myriad for trial and error, and if you survive, the production of new stores of knowledge. Individuals comprised of numerous radically heterogeneous, naturally and socially determined selves, are always experimenting, attempting to divine through reflection and action what works best, even when best means fully embracing who we already are. Choice architects, those persons charged with constructing the environments within which we operate daily, should if responsible regularly run experiments that attempt to eliminate biases and ultimately deliver norms.

that nudge us away from negative defaults toward more optimal ends A constitutional democracy made up of millions of radically heterogeneous densely populated individuals constantly strives to determine what works best for most of its many constituents Because South Africa s Constitution states at an extremely high level of generality only some of the norms that govern our lives it remains for citizens representatives and judges to create doctrines and institutions that serve its capaciously framed ends best After canvassing the relevant literature in neuroscience empirical philosophy behavioural psychology social capital theory development economics and emergent experimental governance this work suggests that manifold experiments in living that fall within the accepted parameters of our shared constitutional norms are likely over time to produce more optimal ways of being that can be replicated by other members of our polity Our reflexive stance toward best practices a linchpin of this book s take on experimental governance when inextricably linked to a commitment to flourishing and to the expansion of individual capabilities should cause us to alter the content of the fundamental norms that shape our lives and bind us to one another A political order founded upon experimental constitutionalism and flourishing promises an egalitarian pluralist reformation of South African society The book spins out its novel thesis against the concrete backdrop of political arrangements and judicial doctrines that have emerged during the first 20 years of our truly vibrant constitutional democracy Its trenchant analysis of political institutions and constitutional case law shows us how far we have come and how far we still have to go *Bantoe-onderwysblad* ,1978 **X-Kit Literature Series: FET Macbeth** ,2005

Transitional societies struggling to build democratic institutions and new political traditions are faced with a painful dilemma How can Government become strong and effective building a common good that unites disparate ethnic and class groups while simultaneously nurturing democratic social rules at the grassroots Professor Fuller brings this issue to light in the contentious multicultural setting of Southern Africa Post apartheid states like South Africa and Namibia are pushing hard to raise school quality reduce family poverty and equalize gender relations inside villages and townships But will democratic participation blossom at the grassroots as long as strong central states so necessary for defining the common good push universal policies onto diverse local communities This book builds from a decade of family surveys and qualitative village studies led by Professor Fuller at Harvard University and African colleagues inside Botswana Namibia and South Africa

Labour Markets and Economic Development S. M. Ravi Kanbur, Jan Svejnar, 2009 This book looks at the links between the formal and informal labor market in developing and transition economies working towards an accurate understanding of labour markets and analyzing alternative policy proposals Labor Markets and Economic Development Ravi Kanbur, Jan Svejnar, 2009-05-07 As developing and transition economies enter the next phase of reforms labor market issues increasingly come to the fore With the increased competition from globalization the discussion is shifting to the need for greater labor market flexibility and the creation of good jobs Moreover the greater actual and perceived insecurity in labor markets has generated a new agenda on how to structure safety nets and labor market regulation The older questions of the links between the formal and informal labor market reappear with new dimensions and significance More generally it is clear that an accurate understanding of how labor market structures function is essential if we are to analyze alternative policy proposals in the wake of these concerns Oddly enough in spite of this great importance there are no recent monographs that bring together rigorous studies produced by academic researchers on these various issues This book fills that gap Under the steady editorship of Ravi Kanbur and Jan Svejnar the contributors flourish in their attempts to enliven these debates The Education Gazette of the Province of the Cape of Good Hope Cape of Good Hope (South Africa).
