**Graphic Design Theory** Helen Armstrong, 2009-03-11 *Graphic Design Theory* presents groundbreaking primary texts from the most important historical and contemporary design thinkers From Aleksandr Rodchenko's *Who We Are Manifesto* of the Constructivist Group to Kenya Hara's *Computer Technology and Design* this essential volume provides the necessary foundation for contemporary critical vocabulary and thought *Graphic Design Theory* is organized in three sections *Creating the Field* traces the evolution of graphic design over the course of the early 1900s including influential avant garde ideas of futurism constructivism and the Bauhaus *Building on Success* covers the mid to late twentieth century and considers the International Style modernism and postmodernism and *Mapping the Future* opens at the end of the last century and includes current discussions on legibility social responsibility and new media Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice A brief commentary prefaces each text providing a cultural and historical framework through which the work can be evaluated

**Digital Design Theory** Helen Armstrong, 2016-06-28 *Digital Design Theory* bridges the gap between the discourse of print design and interactive experience by examining the impact of computation on the field of design As graphic design moves from the creation of closed static objects to the development of open interactive frameworks designers seek to understand their own rapidly shifting profession Helen Armstrong's carefully curated introduction to groundbreaking primary texts from the 1960s to the present provides the background necessary for an understanding of digital design vocabulary and thought Accessible essays from designers and programmers are by influential figures such as Ladislav Sutnar Bruno Munari Wim Crouwel Sol LeWitt Muriel Cooper Zuzana Licko Rudy VanderLans John Maeda Paola Antonelli Luna Maurer and Keetra Dean Dixon Their topics range from graphic design's fascination with programmatic design to early strivings for an authentic digital aesthetic to the move from object based design and to experience based design Accompanying commentary assesses the relevance of each excerpt to the working and intellectual life of designers

**The Graphic Design Process** Anita Nottingham, Jeremy Stout, 2019-11-14 One of the main challenges students face upon entering design school is little knowledge of the field its terminology and best practices Unsurprisingly most new students have never fully developed a concept or visual idea been in a critique or have been asked to explain their work to others This book demystifies what design school is really like and explains what will be experienced at each stage with particular focus on practical advice on topics like responding to design briefs and developing ideas building up confidence and understanding what is expected Student work is critiqued to show how projects are really assessed Profiles highlight how professional designers themselves address client briefs Tips for real life problems are outlined like getting stuck and dealing with critical feedback Written by experienced instructors this is the perfect guide for those starting their design education

Thinking through Graphic Design History Aggie Toppins, 2025-01-23 Graphic design has a paradoxical relationship to history While it claims to promote originality and innovation ideas that emphasize the new and unique design practice is deeply embedded in previous ideals Too often design students encounter the past in brief visual impressions which seduce them to imitate form rather than engage with historical contexts Even though it has claimed to be objective and even comprehensive graphic design history has focused largely on individual careers and Eurocentric achievements Yet the past swells with untapped potential Graphic design history can serve the field of today and tomorrow but its narratives require updates History like design is always changing and like design history is driven by present day questions This book shows how students and practicing designers can enrich their work by thinking historically about design With thoughtful analyses stimulating creative prompts inspiring case studies and perspectives from designers all over the world this book challenges our traditional understanding of graphic design history and the very notion of the design canon offering ways to shape socially engaged critical practices
