

Chapter 12: Mendel and Heredity Study Guide

Section 1 - Origins of Hereditary Science

A. Vocabulary - Use your textbook to define the following terms.

1. Cross breeding - to breed or mate 2 individuals.
2. Characters (Characteristics) - physical features that are inherited.
Ex: hair color, shape of nose.
3. Trait - several possible forms of a character/characteristic.
Ex: Hair Color - brown, blonde, red hair color
4. Self-pollinate - occurs when a plant fertilizes itself; pollen + egg from the same plant.
5. Cross-pollinate - when pollen is transferred to another plant of the same species by insects (bees, butterflies, moths), birds (hummingbird), wind (can transfer pollen), water.
6. Monohybrid Cross - cross involving one pair of traits. Ex: flower color in peas - purple vs. white flowers.
7. Dihybrid Cross - cross involving two pairs of traits. Ex: flower color (purple vs. white flowers) & plant height (tall vs. short) in peas.
8. Generation - group of offspring from a given group of parents.
Ex: Our grandparents represent the 1st generation, parents are the 2nd generation & we are the 3rd generation.
9. Parental/P Generation - the first 2 individuals that mate in a genetic cross. Ex: Grandparents
10. F₁ Generation/First Filial Generation - the offspring from the P generation. Ex: Our parents
11. F₂ Generation/Second Filial Generation - the offspring from the F₁ generation. Ex: Us
12. Allele - Each version of a gene. Ex: brown, blonde, red hair color
13. Dominant - the allele that is expressed in the phenotype (physical appearance - what you can see). Ex: purple pea flowers (PP or Pp)
REMEMBER: the dominant trait masks/hides the recessive when the 2 are together. (T=tall t=short; Tt tall dominates over short)
