Hans-Georg Ziebertz,2020-03-06 Socioeconomic rights include rights with regard to social security labour and employment
as well as cultural rights which may be regarded as a shield for the protection of human dignity especially of specific groups
such as women children and refugees The enforceability of socioeconomic rights clearly distinguishes them from other rights
These rights need perhaps more than others the support of civil society Because states have leeway in how resources are
distributed civil society has a major impact on what resources are used to fulfil socio economic rights One of the actors in the
public arena are religious traditions respective Churches Most of them have developed ethical standards for individual
conduct and rules for living together in society based on their basic scriptures All three monotheistic religions Judaism
Christianity and Islam are marked by a caring engagement for the poor the sick the old and the foreign From an empirical
perspective the general research question of this volume is how young people understand and evaluate socioeconomic rights
and to which degree religious convictions and practices are connected with attitudes towards these human rights Can
religion be identified as a force supporting the human rights regime and which additional concepts strengthen or weaken the
consent to these rights The richness of empirical data contributes to a better understanding how socioeconomic rights are
legitimated in the opinion of more than 10 000 respondents in 14 countries The Standard ,1901 **Reference**
