Mentoring in STEM Through a Female Identity Lens: Heroes Make a Difference for Women Cecilia (Ceal) D.

Craig, 2024-09-24 With the stagnant low percentages of women in STEM careers identifying practices to satisfy the growing need for professionals in those fields is critical to improve recruitment and retention Supportive relationships like mentors and sponsors have been shown to both inspire women to pursue those careers and to help them succeed in them This book explores how developing supportive connections helps students faculty and teachers see STEM professions as being a place for women to grow and succeed Early chapters provide essential mentor characteristics and explore engineering education gender inequity from a teacher's perspective of stereotypes stereotype threat and bias offering culturally relevant teacher mentoring approaches to promote equitable pre college engineering education Middle chapters describe K 12 mentoring programs mentorship initiatives empowering young South African Women and girls to advance to mathematical related careers programs methods and activities to achieve the desired goal of making young students aspire to become scientists and engagement year round in grades 9 12 combined with 40 years of iterative evaluation created a finely honed enrichment program for low income Black women in urban public high schools A longitudinal undergraduate mentoring program for mentoring early college students in Louisiana provides further insights in that section The final four chapter section describes mentoring programs for professors and teachers reciprocal mentor relationships and role shifting within an informal peer mentoring group differences between mentoring relationships and sponsoring relationships within academia the impact of culturally responsive mentorship CRM on the development and expression of a pre service teacher's woman of science identity and a program that aims to recruit and retain STEM pre service teachers and STEM teachers of color With several longitudinal mentoring programs several programs for women of color this book fills a gap to help grow the numbers of women in STEM

The Primacy of PISA Joseph M. Piro, 2019-08-21 Every three years the world awaits the results of the Programme for International Student Assessment or PISA the rankings of school systems overseen by the Organisation for Economic Co operation and Development OECD Nations around the world look eagerly and apprehensively to see where their students rank on these tests of competence in mainly science math and reading This book provides a window into PISA and its power What exactly is PISA How are its tests developed Who takes the test What countries tend to outperform and which underperform What do countries learn from PISA Why is PISA both revered and feared And most importantly does PISA improve education globally The first PISA in 2000 included 32 countries In 2018 nearly eighty nations took part in PISA That number is expected to double by 2030 This may mean that students in over 80% of the world's countries will take the PISA exams This scenario has made PISA more important than ever This book probes topics and themes related to the world's most important exam and why many view a high PISA ranking rightly or wrongly as global education's seal of approval Because of this PISA has been called a disruptor a test which can trigger

major reform in school systems around the world But is it the PISA rankings that are the real disruptor or the decisions countries make because of their rankings These decisions often involve systemic changes in teaching and learning which can substantially alter how a country measures and prioritizes its education system *Long-Range Dependent Processes: Theory and Applications* Ming Li, Carlo Cattani, 2022-12-05 *International Perspectives on Gender and Higher Education* Christine Fontanini, K.M. Joshi, Saeed Paivandi, 2020-11-26 Despite improved access to higher education for women the distribution of women and men varies considerably between fields of study The chapters in this edited collection explore the participation status of women in higher education across the varying socio economic and sociological backgrounds observed in different countries and regions [Yearbook of International Organizations 2013-2014 \(Volumes 1a-1b\)](#) Union Of International Associations, Union of International Associations, 2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *Toward the Factory of the Future* K. Kornwachs, Hans-Jörg Bullinger, Hans-Jürgen Warnecke, 2013-12-14 The International Conference on Production Research has a good tradition The first Conference was held in Birmingham 1971 with 61 participants With respect to the decision that the Conference should be held every second year by this time the Conference has been held in the following countries Birmingham 1971 UK Copenhagen 1973 Denmark Amhurst 1975 USA Tokyo 1977 Japan Amsterdam 1979 The Netherlands Novi Sad 1981 Yugoslavia Windsor 1983 Canada Stuttgart 1985 Germany and the next Conference will take place in Cincinnati 1987 USA The number of submitted abstracts and papers was continuously increasing such that the Programme Committee of this actual 8th Conference on Production Research has been forced to introduce a further refereeing procedure Each submitted abstract was presented to at least two referees This resulted not only in a reduction of the number of presented full papers and poster contributions but as the Programme Committee and the Editors hope it led also to a considerable increase in the scientific quality of this 8th International Conference on Production Research The preceding conference in Windsor Canada was dedicated to the topic Production Research as a Means of Productivity Improvement We don't believe that this statement has become untrue in the meanwhile
