an acid and a base react not to produce a salt and a solvent but to form a new acid and a new base the concept of neutralization is thus absent brønsted lowry acid base behavior is formally independent of any solvent making it more all encompassing than the arrhenius model

14 3 relative strengths of acids and bases chemistry libretexts - Jul 10 2022

oct 4 2023 brønsted lowry acid base chemistry is the transfer of protons thus logic suggests a relation between the relative strengths of conjugate acid base pairs the strength of an acid or base is quantified in its ionization constant K_a or K_b which represents the extent of the acid or base ionization reaction
