a practical person and a natural artist Indian inventions are commonly both serviceable and beautiful Other tents are hard to pitch hot in summer cold in winter poorly lighted unventilated easily blown down and ugly to boot The conical tipi of the Plains Indian has none of these faults It can be pitched by one person It is roomy well ventilated at all times cool in summer well lighted proof against high winds and heavy downpours and with its cheerful fire inside snug in the severest winter weather Moreover its tilted cone trim smoke flaps and crown of poles presenting a different silhouette from every angle form a shapely stately dwelling even without decoration In this new edition the Laubins have retained all the invaluable aspects of the first edition and have added a tremendous amount of new material on day to day living in the tipi the section on Indian cooking has been expanded to include a large number and range of Indian foods and recipes as well as methods of cooking over an open fire with a reflector oven and with a ground oven there are new sections on making buckskin making moccasins and making cradle boards there is a whole new section on child care and general household hints Shoshoni Cree and Assiniboine designs have been added to the long list of tribal tipi types discussed This new edition is richly illustrated with color and black and white photographs and drawings to aid in constructing and living in the tipi It is written primarily for the interested amateur and will appeal to anyone who likes camping the out of doors and American Indian lore *The American Exporter*, 1902 *The Northwestern Miller*, 1894 *Primitive Technology* David Wescott, 1999 Living in modern society we have become increasingly disassociated from the earth from the essence of ourselves and the need is awakened in us to return to the wilderness physically and emotionally We long to feel a sense of connection with our ancient roots This urge is what has prompted man's fascination with primitive skills producing objects from natural materials using methods similar to prehistoric cultures *Primitive Technology A Book of Earth Skills* is a sharing of ideas the philosophies the history and the personal stories by the authorities on primitive technology from the pages of *The Bulletin of Primitive Technology* Included are instructions for creating fire and tools of wood stone and bone as well as fiber adhesives projectiles art and music Practicing these primitive methods will lead the seeker towards a tangible raw connection with the ancient past with nature's resources and ultimately with the creative forces that constructed the foundation of man's survival on the planet

American Machinist, 1901 **The Book of Camping and Woodcraft** Horace Kephart, **Living Dangerously** James M. Ronan, 2015-08-06 Ask the average American who takes over in the event something happens to the President of the United States and you're likely to receive the correct answer However what about succession beyond the vice presidency Fortunately our nation has an established line of presidential succession that is meant to ensure continuity in the nation's highest office Unfortunately there are several fundamental flaws in the model This work begins by examining the fascinating history of presidential disability and succession an issue that has impacted our nation's highest office since the very beginning After highlighting the reoccurring nature of this problem it then provides an analysis of the alarming state of our current disability and succession guidelines many of which are dangerously outdated especially when it comes to the threat

of terrorism It then explores these flaws specifically the glaring problems associated with including members of Congress in the line of succession Along with questions concerning suitability and preparedness statistics detailing the partisan composition of Congress over the last half century illustrate that a sudden shift in party control of the presidency is not only possible but likely Finally it concludes by highlighting an inherent flaw in a line of succession in which every member is located in one small area that happens to be the most attractive target for a would be terrorist While the issues explored in this work have been present for more than a half century the combination of an increased partisan divide between the executive and legislative branches as well as the dangers of terrorist attack combine to require immediate action Just as the average American may be surprised to discover the Speaker of the House stands second in the line of succession they would likely be shocked at the potential for chaos and confusion that could unfold in a battle for the presidency Therefore it is vitally important to address these concerns now before they play out in front of a national audience **American**
