

4. Inspect the tire for wear and damage.
5. Inspect tread depth. Replace worn tires.

WARNING

Replace punctured or damaged tires. In some cases, small punctures in the tread area may be repaired from within the removed tire by a Harley-Davidson dealer. Speed should NOT exceed 50 mph (80 km/h) for the first 24 hours after repair, and the repaired tire should NEVER be used over 80 mph (130 km/h). Failure to follow this warning could lead to tire failure and result in death or serious injury. (00015b)

6. Repair tread on tubeless tires if puncture is 1/4 in (6.4 mm) or smaller. Make repairs from inside the tire.
7. Always combine a patch and plug when repairing damaged tires.

INSTALLATION

FASTENER	TORQUE VALUE	
Valve stem nut	12-15 in-lbs	1.4-1.7 Nm

WARNING

Harley-Davidson front and rear tires are not the same. Interchanging front and rear tires can cause tire failure, which could result in death or serious injury. (00026a)

WARNING

Do not exceed manufacturer's recommended pressure to seat beads. Exceeding recommended bead seat pressure can cause tire rim assembly to burst, which could result in death or serious injury. (00022a)

WARNING

Be sure tires are properly inflated, balanced, undamaged, and have adequate tread. Inspect your tires regularly and see a Harley-Davidson dealer for replacements. Riding with excessively worn, unbalanced, improperly inflated, overloaded or damaged tires can lead to tire failure and adversely affect stability and handling, which could result in death or serious injury. (00014b)

For tire pressures, see 1.9 TIRES AND WHEELS, Tires.

Some tires have arrows molded into the tire sidewall. Mount these tires with the arrow pointing in the direction of forward rotation. The colored dot on the sidewall is a balance mark. Align it with the valve stem.

Tube Type Tires

WARNING

Match tires, tubes, rim strips or seals, air valves and caps to the correct wheel. Contact a Harley-Davidson dealer. Mismatching can lead to tire damage, allow tire slippage on the wheel or cause tire failure, which could result in death or serious injury. (00023c)

NOTES

- For correct tire and tube types, see 2.2 SPECIFICATIONS.
 - When replacing a tube type tire, replace the tube. Inner tubes should be patched only as an emergency measure. Replace a damaged or patched tube as soon as possible. Always use a rim strip on all tube-type laced wheels.
1. See Figure 2-38. On tube type laced wheels, verify that no spokes protrude through nipples. Install a rim strip into the rim well. Check to align the valve stem hole in rim strip with valve stem hole in rim.
 2. Install tube and tire.

Figure 2-38. Installing Rim Strip

Tubeless Tires: Cast Wheels

WARNING

Only install original equipment tire valves and valve caps. A valve, or valve and cap combination, that is too long or too heavy can strike adjacent components and damage the valve, causing rapid tire deflation. Rapid tire deflation can cause loss of vehicle control, which could result in death or serious injury. (00021a)

On tubeless cast wheels, replace damaged or leaking valve stems.

1. See Figure 2-39. Install rubber grommet (5) on valve stem.
2. Insert valve stem into rim hole.
3. Install metal washer (4) and nut (3).
4. Tighten to 12-15 in-lbs (1.4-1.7 Nm).
5. Install tire.
