Emerging Evangelicals James S. Bielo, 2011 The Emerging Church movement developed in the mid 1990s among primarily white urban middle class pastors and laity who were disenchanted with America's conservative Evangelical sub culture It is a response to the increasing divide between conservative Evangelicals and concerned critics who strongly oppose what they consider overly slick corporate and consumerist versions of faith A core feature of their response is a challenge to traditional congregational models often focusing on new church plants and creating networks of related house churches Drawing on three years of ethnographic fieldwork James S Bielo explores the impact of the Emerging Church movement on American Evangelicals He combines ethnographic analysis with discussions of the movement's history discursive contours defining practices cultural logics and contentious interactions with conservative Evangelical critics to rethink the boundaries of Evangelical as a category Ultimately Bielo makes a novel contribution to our understanding of the important changes at work among American Protestants and illuminates how Emerging Evangelicals interact with the cultural conditions of modernity late modernity and visions of postmodern Christianity James S Bielo is Visiting Assistant Professor of Anthropology at Miami University in Oxford OH He is the author of *Words Upon the Word: An Ethnography of Evangelical Group Bible Study* NYU Press and editor of *The Social Life of Scriptures: Cross cultural Perspectives on Biblicalism*

**Career Construction Theory and Life Writing** Hywel Dix,2021-05-13 This volume applies the insight and methods of career construction theory to explore how autobiographical writing is used in different professional careers from fiction and journalism to education and medicine It draws attention to the fact that a career is a particular kind of artefact with distinctive properties and features that can be analysed and compared and puts forward a new theory of the relationship between narrative methodology and the vocation of writing Career construction theory emerged in the late twentieth century when changes to the patterns of our working lives caused large numbers of people to seek new forms of vocational guidance to navigate those changes It employs a narrative paradigm in which periods of uncertainty are treated as experiences akin to writer s block experiences which can be overcome first by imagining new character arcs then by narrating them and finally by performing them By encouraging clients to see their careers as stories of which they are both the metaphorical authors and the main protagonists career construction counsellors enable them to envisage the next chapter in those stories But despite the authorial metaphor career construction theory has not been widely applied to analysis of professional careers in writing The chapters in this volume remedy that gap and in various ways apply the insights of career construction theory to analyse the relationship between writing and professional life in diverse careers where writing is used The chapters in this book were originally published in the journal *Life Writing*
