The Class Sonia Livingstone,Julian Sefton-Green,2016-05-03 An intimate look at how children network identify learn and grow in a connected world Read Online at connectedyouth.nyupress.org Do today s youth have more opportunities than their parents As they build their own social and digital networks does that offer new routes to learning

and friendship How do they navigate the meaning of education in a digitally connected but fiercely competitive highly individualized world Based upon fieldwork at an ordinary London school The Class examines young people s experiences of growing up and learning in a digital world In this original and engaging study Livingstone and Sefton Green explore youth values teenagers perspectives on their futures and their tactics for facing the opportunities and challenges that lie ahead The authors follow the students as they move across their different social worlds in school at home and with their friends engaging in a range of activities from video games to drama clubs and music lessons By portraying the texture of the students everyday lives The Class seeks to understand how the structures of social class and cultural capital shape the development of personal interests relationships and autonomy Providing insights into how young people s social digital and learning networks enable or disempower them Livingstone and Sefton Green reveal that the experience of disconnections and blocked pathways is often more common than that of connections and new opportunities

Connected Gaming

Yasmin B. Kafai,Quinn Burke,2016-12-23 How making and sharing video games offer educational benefits for coding collaboration and creativity Over the last decade video games designed to teach academic content have multiplied Students can learn about Newtonian physics from a game or prep for entry into the army An emphasis on the instructionist approach to gaming however has overshadowed the constructionist approach in which students learn by designing their own games themselves In this book Yasmin Kafai and Quinn Burke discuss the educational benefits of constructionist gaming coding collaboration and creativity and the move from computational thinking toward computational participation Kafai and Burke point to recent developments that support a shift to game making from game playing including the game industry s acceptance and even promotion of modding and the growth of a DIY culture Kafai and Burke show that student designed games teach not only such technical skills as programming but also academic subjects Making games also teaches collaboration as students frequently work in teams to produce content and then share their games with in class or with others online Yet Kafai and Burke don t advocate abandoning instructionist for constructionist approaches Rather they argue for a more comprehensive inclusive idea of connected gaming in which both making and gaming play a part
