**Special Report of the Director-General on the Application of the Declaration Concerning the Policy of "apartheid" of the Republic of South Africa** International Labour Office, International Labour Organization, 1987

*Special Report of the Director-General on the Application of the Declaration Concerning the Policy of Apartheid in South Africa* International Labour Office, 1986      Turfloop a Conscious Pariah Kanyane Chris Kanyane, Chris Kanyane, 2010 This book provides reflections on the butterfly effect on how Turfloop brought in the Age of Barack Obama What is the Age of Barack Obama To paraphrase Dr Ineke Van Kessel a prominent historian at the Leiden University in the Netherlands The University of the North also known as Turfloop played a vital role as the center of communication coordination ideological direction the engine of bringing the new South Africa was University of the North We approached this book like detectives Fortunately in our detective work we were not concerned with a particular agenda we were not trying to prove that a certain method of thinking was right or wrong We didn't want this book to be filled with personal opinions and biases We wanted this book to be juicy and accessible to every person who reads it in whatever corner of the world We have to back up our story with facts of course and get other people to do practical analysis and later we added our own perspectives When we completed writing this book we passed it around amongst critical people spread across the globe Most of them said that the book is somehow highbrow and at the same time all together lowbrow which came as a compliment A lot of people are somewhere in between We want this book to embody that because there are many people there we want them to appreciate this book      **In the Event** Lotte Meinert, Bruce Kapferer, 2015-05-01 Events are generative moments in at least three senses events are created by and condense larger scale social structures as moments they spark and give rise to new social processes in themselves events may also serve to analyze social situations and relationships Based on ethnographic studies from around the world varying from rituals and meetings over protests and conflicts to natural disasters and management this volume analyzes generative moments through events that hold the key to understanding larger social situations These events including the Ashura ritual in Bahrain social cleavages in South Africa a Buddhist cave in Nepal drought in Burkina Faso an earthquake in Pakistan the cartoon crisis in Denmark corporate management at Bang Olufsen protest meetings in Europe and flooding and urban citizenship in Mozambique are not simply destructive disasters crises and conflicts but also generative and constitutive of the social      *The Origin and Growth of Geography as a discipline at South Africa Universities* Gustav Visser, 2016-09-20 The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities The book showcases a broad and textured review of South Africa's geography departments their staff members their times and the different Geographies they engaged in The book lays the foundation from which more expansive individual departmental histories can be written in the future      **Year of Fire, Year of Ash** Baruch Hirson, 2016-06-15 We can say without fear of being contradicted by history that June 16 1976

heralded the beginning of the end of the centuries old white rule in this country Nelson Mandela Originally banned on publication by the apartheid government Year of Fire Year of Ash is an eye opening account of how in June 1976 20 000 school students faced down the tanks and guns of a vicious racist regime in a revolt that galvanized the black working class and became a pivotal turning point for the anti apartheid movement More than this the book overturns much of the conventional logic that served to explain the event at the time showing it was not simply a student protest but part of a wider uprising Released in this new edition to mark the fortieth anniversary Year of Fire Year of Ash provides an unparalleled insight into the origins and events of the uprising from its antecedents in the 1920s to its role in inspiring global solidarity against apartheid As South Africa experiences a new wave of popular discontent and as new forms of black consciousness come to the fore in movements around the world Baruch Hirson s book provides a timely reminder of the Soweto revolt s continued significance to struggles against oppression today **The Faces of Africa: Diversity and Progress** ,1972

The Burden of Educational Exclusion ,2010-01-01 School was nothing but a taboo for me concludes Johannah a young South African after recounting her life story Johannah is one of the early school leavers who features in this book Figures on

participation in education in Africa show that despite government agreements and policies developed under the banner of Education for All this remains a remote goal In several countries programmes on Universal Primary Education have improved access to education but do those who enter school remain there until they have reached a suitable level Do they acquire enough competences at primary and secondary school to survive the tough daily life in sub Saharan countries What happens to children and young adults who leave school early What measures can be taken to prevent them from doing so This book is based on research carried out in Eastern and Southern Africa by scholars from Africa and the Netherlands who cooperated within the framework of the ESLA project The contributions to this book reflect the exchanges and discussions which took place in this research group initiated by staff of Mzumbe University in Tanzania Uganda Martyrs University and the University of Groningen in the Netherlands The group aims to go beyond figures and uncover the causes effects and stories of the young people involved as well as explore promising new strategies with which to address their needs As early school leaving is not exclusively an African problem a contribution on the Dutch situation is also included The book concludes that exclusion from education has far reaching effects not only for the young people involved but also for the society in which they live The burden of educational exclusion should be the joint responsibility of developing and developed countries The authors hope the book will contribute not only to a greater understanding of the phenomenon of early school leaving but also challenge it in terms of developing policies and programmes that can prevent educational exclusion and support those who already find themselves in such a situation

*White Man's Justice* Michael Lobban,1996 This major new study examines the use of political trials by the apartheid regime in South Africa against its opponents in the 1970s the decade when the ideology of apartheid was reaching its apogee After tracing the early history of the South African Students Organization and the Black People s Convention it shows how the state reacted to the threat posed by the black consciousness movement by launching a major trials of ideas using the notorious Terrorism Act It examines how at the same time the authorities sought to crack down on white dissent by prosecuting the leaders of the National Union of South African Students By making a detailed study of trial transcripts in addition to other materials it explores how the state sought to infiltrate and crush nascent ANC and PAC structures which were re emerging in the mid 1970s within South Africa It shows how the prosecution policy and the legal strategy of the state changed during the decade as the nature of the threats it faced altered culminating in the trial of the leaders of the Soweto Students Representative Council in 1979 for sedition Arguing that the political trial was perhaps the only venue where white ideology had to engage directly with black protest this original and thought provoking account demonstrates how the trials became platforms for competing views of society and politics which give a unique insight into the conflict between the political ideals held by blacks and whites in this era It also reveals how large a part politics played in securing the conviction of many dissenters and how large a part events beyond the courtroom played in the detention and torture of many activists
