MARTYN. RANDALL, 2020 *Vehicle Propulsion Systems* Lino Guzzella, Antonio Sciarretta, 2012-12-25 This text provides an introduction to the mathematical modeling and subsequent optimization of vehicle propulsion systems and their supervisory control algorithms Automobiles are responsible for a substantial part of the world's consumption of primary energy mostly fossil liquid hydrocarbons and the reduction of the fuel consumption of these vehicles has become a top priority Increasing concerns over fossil fuel consumption and the associated environmental impacts have motivated many groups in industry and academia to propose new propulsion systems and to explore new optimization methodologies This third edition has been prepared to include many of these developments In the third edition exercises are included at the end of each chapter and the solutions are available on the web **Vehicle Propulsion Systems** L. Guzzella, Antonio Sciarretta, 2005 Automobiles

are responsible for a substantial part of the world's consumption of primary energy mostly fossil liquid hydrocarbons The reduction of the fuel consumption of these vehicles has become a top priority Many ideas to reach that objective have been presented In most cases these systems are more complex than the traditional approaches For such complex systems a heuristic design approach fails The only way to deal with this situation is to employ model based methods This text provides an introduction to the mathematical modeling and subsequent optimization of vehicle propulsion systems and their supervisory control algorithms *Automotive Engineering International*, 2004 **2015 Passenger Car and 2014**
