Miscellaneous Report Saskatchewan Energy And Mines:

Geological Survey of Canada, Open File 3119 , Saskatchewan Bernard D. Thraves, 2007 Saskatchewan Geographic Perspectives is Saskatchewan's first comprehensive geography textbook. Its major sections cover these themes: Physical Geography, Historical and Cultural Geography, Population and Settlement, and Economic Geography. Eighteen chapters provide an excellent overview of the province from a variety of geographic perspectives, while twenty-nine focus studies explore specific topics in depth. It presents the work of forty-three scholars and is well illustrated with more than 150 figures, 70 tables, and over 60 full-colour plates. It also includes full reference lists and a comprehensive index. Although prepared specifically for use in post-secondary geography programs, this book is also appropriate for high school research projects and for anyone interested in the many facets of this vast and varied province. *Googlebooks*

Energy Developments: New Forms, Renewables, Conservation Fred A. Curtis, 2013-09-17 *Energy Developments: New Forms, Renewables, Conservation* is a collection of papers that discusses alternative energy sources. In discussing these energy sources, the text considers factors such as technical, economic, and human dimensions. The first part of the text presents articles that cover forms of energy such as the feasibility of coal gasification and electric power from salinity gradients by reverse electrodialysis. Next, the book reviews materials about renewable forms of energy that include genetically improved hardwoods as a potential energy source and heat pump investigations for northern climate applications. In the last part, the text provides studies that deal with energy conservation such as shared savings financing for energy efficiency and consumer information and government energy conservation incentive programs. The book will be of use to scientists, engineers, and technicians involved in the research, development, and implementation of alternative energy technology. *Geological Survey of Canada, Current Research (Online) no. 2002-C25*

David Corrigan, 2002. This paper reports on the first field season of a new initiative designed to provide a regional tectonostratigraphic context for supracrustal plutonic rocks that form the northern flank of the Trans-Hudson Orogen. It reviews the regional geology of the Lynn Lake belt area of northern Manitoba, then presents results of potential tectonostratigraphic correlations with the Reindeer Lake area of Saskatchewan, as well as descriptions of supracrustal rocks in the Southern Indian Domain, Pukatawagan Bay, and Missi Falls-Partridge Breast Lake areas. The final section assesses the economic potential of the study area.

Biogeochemistry in Mineral Exploration Colin E. Dunn, 2011-08-30 Significant refinements of biogeochemical methods applied to mineral exploration have been made during more than twenty years since the last major publication on this technique. This innovative, practical, and comprehensive text is designed as a field handbook and an office reference volume. It outlines the historical development of biogeochemical methods applied to mineral exploration and provides details of what, how, why, and when to collect samples from all major climatic environments, with examples from around the world. Recent commercialization of sophisticated analytical technology permits immensely more insight into the multi-element composition of plants. In particular, precise

determination of ultra trace levels of pathfinder elements in dry tissues and recognition of element distribution patterns with respect to concealed mineralization Data handling and interpretation are discussed in context of a wealth of previously unpublished information including a section on plant mineralogy much of which has been classified as confidential until recently Data are provided on the biogeochemistry of more than 60 elements and by case history examples their roles discussed in assisting in the discovery of concealed mineral deposits A look to the future includes the potential role of bacteria to provide new focus for mineral exploration Describes the practical aspects of plant selection and collection in different environments around the world and how to process and analyze them Discusses more than 60 elements in plants with data interpretation and case history results that include exploration for Au PGEs U base metals and kimberlites

Geological Survey of Canada, Current Research (Online) no. 2000-C13 D. Corrigan, 2000 Describes results of field work in the northern region of Reindeer Lake on the northern Saskatchewan Manitoba border where mapping was carried out from the interior of the Proterozoic Wathaman Batholith to the Archean Peter Lake Domain The main objective was to establish the nature and timing of the contact relationship between the Archean craton margin and the Wathaman Batholith Evidence is also presented regarding the nature of the Swan River Pluton and similar bodies north west of the Batholith *Annual Report Saskatchewan. Saskatchewan Energy and Mines, 1994*

Quantitative Diagenesis: Recent Developments and Applications to Reservoir Geology A. Parker, B.W. Sellwood, 2012-12-06 Reservoirs generally consist of sandstones or carbonates exhibiting heterogeneities caused by a wide range of factors Some of these formed depositionally e g as channels palaeosols clay seams or salts others may be diagenetic in origin e g carbonate or silica cemented zones authigenic clays karstic surfaces The severity with which diagenesis affects rock systems results from the interplay between the diagenetic process itself and the timescale over which it operated The book provides a wide ranging overview of diagenetic processes and responses in calcareous argillaceous arenaceous and carbon rich microbial and organic sedimentary systems It introduces diagenetic concepts reviews existing knowledge and shows how existing qualitative approaches might be developed in more quantitative ways Several chapters consider mass balance calculations and the temporal and spatial aspects of diagenetic processes It is unique as a textbook in providing such a breadth of diagenetic subject range and such depth of coverage in each topic It provides a source reference for advanced students and professionals active in reservoir and aquifer studies

The Precambrian Earth P.G. Eriksson, Wladyslaw Altermann, D.R. Nelson, W.U. Mueller, O. Catuneanu, Octavian Catuneanu, 2004-03-04 In this book the editors strive to cover all primary i e non applied topics in Precambrian geology in a non partisan way by using a large team of international authors to present their datasets and highly divergent viewpoints The chapters address celestial origins of Earth and succeeding extraterrestrial impact events generation of continental crust and the greenstone granite debate the interaction of mantle plumes and plate tectonics over Precambrian time Precambrian volcanism emphasising komatiite research evolution and models for Earth s hydrosphere and

atmosphere evolution of life and its influence on Precambrian ocean chemistry and chemical sedimentation sedimentation through Precambrian time the application of sequence stratigraphy to the Precambrian rock record Each topic is introduced and a non partisan closing commentary provided at the end of each chapter The final chapter blends the major geological events and rates at which important processes occurred into a synthesis which postulates a number of event clusters in the Precambrian when significant changes occurred in many natural systems and geological environments Also available in paperback ISBN 0 444 51509 7 Low-Grade Metamorphism of Mafic Rocks Peter Schiffman,Howard W.
