Science Teacher Education Sandra K. Abell,2005-12-16 Analysis of past developments in teacher education in Pakistan has shown that substantial progress has been made in this field It has however been pointed out that education of science teachers still needs much improvement At the present there is an emergent need to meet the shortage of qualified science teachers and at the same time to bring qualitative improvements in the courses offered in teacher education institutions First we recommend that the 1 year duration of teacher preparation is grossly inadequate for all teaching courses and should be lengthened and the qualifications for entrance be increased We believe that teaching must be made a graduate profession For example the basic qualification of primary school teachers for admission to teacher education institution should be increased We recommend that PTC should be made a 12 2 year program Similarly CT 12 3 B Ed 14 2 B S Ed 12 4 M A Ed 14 3 and M Ed one year after B Ed or B S Ed Secondly we think the quality of instruction in teacher preparation programs should be improved Most teachers in the teacher preparation institutions use the lecture method most of the time

Social Studies Education in South and South East Asian Contexts Kerry J Kennedy,2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them

Beyond the Bubble Test Linda Darling-Hammond, Frank Adamson,2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what s possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U S borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us
