Parliament Alexander Horne, Andrew Le Sueur, 2016-06-02 This collection of essays by leading academics lawyers

parliamentarians and parliamentary officials provides a critical assessment of the UK Parliament's two main constitutional roles as a legislature and as the preeminent institution for calling government to account. Both functions are undergoing change and facing new challenges. Part 1: Legislation includes chapters on Parliament's emerging responsibilities for pre-legislative scrutiny of government Bills and for evaluating proposed legislation against explicit constitutional standards. The impact on legislation of the European Union and the growing influence of the House of Lords are also examined. Part 2: Accountability investigates how Parliament operates to scrutinise areas of executive action previously often shielded from effective parliamentary oversight including national security, war-making powers and administrative justice. There are also chapters on parliamentary reform including analysis of the House of Commons. Wright reforms parliamentary sovereignty, privilege and the European Convention on Human Rights. Euroscepticism and parliamentary sovereignty and the regulation of lobbyists. The book will be of interest to anyone who is curious about the work of Parliament and is aimed at legal academics, practitioners and political scientists.

Big Data Meets Survey Science Craig A. Hill, Paul P. Biemer, Trent D. Buskirk, Lilli Japac, Antje Kirchner, Stas Kolenikov, Lars E. Lyberg, 2020-09-29. Offers a clear view of the utility and place for survey data within the broader Big Data ecosystem. This book presents a collection of snapshots from two sides of the Big Data perspective. It assembles an array of tangible tools, methods and approaches that illustrate how Big Data sources and methods are being used in the survey and social sciences to improve official statistics and estimates for human populations. It also provides examples of how survey data are being used to evaluate and improve the quality of insights derived from Big Data. Big Data Meets Survey Science: A Collection of Innovative Methods shows how survey data and Big Data are used together for the benefit of one or more sources of data, with numerous chapters providing consistent illustrations and examples of survey data enriching the evaluation of Big Data sources. Examples of how machine learning, data mining and other data science techniques are inserted into virtually every stage of the survey lifecycle are presented. Topics covered include: Total Error Frameworks for Found Data Performance and Sensitivities of Home Detection on Mobile Phone Data; Assessing Community Wellbeing Using Google Street View and Satellite Imagery; Using Surveys to Build and Assess RBS Religious Flag and more. Presents groundbreaking survey methods being utilized today in the field of Big Data. Explores how machine learning methods can be applied to the design, collection and analysis of social science data. Filled with examples and illustrations that show how survey data benefits Big Data evaluation. Covers methods and applications used in combining Big Data with survey statistics. Examines regulations as well as ethical and privacy issues. Big Data Meets Survey Science: A Collection of Innovative Methods is an excellent book for both the survey and social science communities as they learn to capitalize on this new revolution. It will also appeal to the broader data and computer science communities looking for new areas of application for emerging methods and data sources.
