25 Years of p53 Research Pierre Hainaut, Klas G. Wiman, 2007-10-05 1 Communication awareness and access to information Given the complexity of the field and the fact that data pertaining to each particular aspect of p53 biology or deregulation are scattered in many different publications it is extremely difficult to access the full scale of relevant information of any specific p53 related topic Review articles despite their fundamental role in disseminating knowledge usually focus only on general mechanisms and do not discuss in detail the many variations that can occur with respect to cell type particular mutation type as well as biological activation context Books such as this one may help in this task by putting into perspective both general considerations on the p53 pathway and more specific information on various aspects of p53 In the longer term however open access to p53 complexity will require the development of knowledge bases accessible through the web and using simple navigation tools to guide users towards the specific information they need Several efforts are

currently being developed in that direction They need to be strengthened and better integrated within the rapidly growing galaxy of web based information sources on molecular and individual variations in cancer

2 Reference functional assays and structural analysis Given the huge diversity of cellular and animal models for wild type or mutant p53 functions it will be important to set up standard universally accepted assays to measure critical p53 protein functions Medical Laboratory Science Review Robert R Harr,2012-10-11 Use this comprehensive resource to gain the theoretical and practical knowledge you need to be prepared for classroom tests and certification and licensure examinations A Fatal Inheritance Lawrence Ingrassia,2024-05-14 Nominated for the National Book Critics Circle Award in Nonfiction Named a best book of the year by Amazon NPR and Kirkus Weaving his own moving family story with a sweeping history of cancer research Lawrence Ingrassia delivers an intimate gripping tale that sits at the intersection of memoir and medical thriller Ingrassia lost his mother two sisters brother and nephew to cancer different cancers developing at different points throughout their lives And while highly unusual his family is not the only one to wonder whether their heartbreak is the result of unbelievable bad luck or if there might be another explanation Through meticulous research and riveting storytelling Ingrassia takes us from the 1960s when Dr Frederick Pei Li and Dr Joseph Fraumeni Jr first met not yet knowing that they would help make a groundbreaking discovery that would affect cancer patients for decades to come to present day as Ingrassia and countless others continue to unpack and build upon Li and Fraumeni s initial discoveries and to understand what this means for their families In the face of seemingly unbearable loss Ingrassia holds onto hope He urges us to fight like Charlie his nephew who battled cancer his entire life starting with a rare tumor in his cheek at the age of two and to look toward the future as gene sequencing screening protocols CRISPR gene editing and other developing technologies may continue to extend lifespans and perhaps one day even offer cures **Clinical Core Laboratory Testing** Ross Molinaro,Christopher R. McCudden,Marjorie Bonhomme,Amy Saenger,2016-12-26 The clinical laboratory is often known as a black box to nurses physicians and surgeons but this concise book removes the veil by covering all the pertinent aspects of the clinical laboratory This book bridges between medicine and chemistry by offering an overview to a clinical laboratory s structure and function the importance of laboratory utilization and test ordering as well as pre analytical analytical and post analytical issues of importance to recognize in any clinical laboratory An interactive FAQ and a detailed index are also available

Programmed Cell Death Yun Bo Shi,Yufang Shi,Yonghua Xu,David W. Scott,2013-06-29 This volume contains papers that were presented and discussed at The 1996 International Symposium on Programmed Cell Death which was held in the Shanghai Science Center of the Chinese Academy of Sciences on September 8 12 1996 Apoptosis has attracted great attention in the past several years This is reflected in part by the exponential increase in the number of papers published on the subject While several major scientific conferences have been held in recent years this meeting represents the first major international scientific meeting on programmed cell death held in Asia where fast economic growth promises a bright future for both basic and applied research in biomedical sciences We organized the meeting with the belief that such a gathering would foster a closer interaction between scientists from the West and those in Asia Research on programmed cell death has expanded so extensively that no one meeting can cover all the important subjects related to apoptosis The Shanghai meeting

focused on several key areas ranging from well established ones such as cell death in the immune system to emerging ones such as the role of ECM in regulating cell fate. Specifically the subjects presented and discussed included programmed cell death during development the regulation and biochemical mechanisms of lymphocyte apoptosis the involvement of extracellular matrix and its remodeling in programmed cell death genes that cause or prevent cell death and the application of apoptosis toward cancer therapy.
