Exemplars of Assessment in Higher Education, Volume Two Jane Marie Souza, Tara A. Rose, 2023-11-09 In this second volume of the successful Exemplars of Assessment in Higher Education editors Souza and Rose share examples of assessment practice from over fifteen distinct and diverse Higher Education Institutions including international contributions Building upon the work of the first volume the case studies in this book reflect the changes in assessment and higher education in the post Covid education environment The institutions that appear in this book were chosen for having an effective assessment approach in one or more of the following areas career readiness distance education diversity equity and inclusion or general education Each part of the book discusses one of these four areas with chapters that feature real life examples from the educators who teach at the college or university Featuring a Foreword by AAC U President Lynn Pasquerella the work highlighted in this book is also aligned with AAC U s Valid Assessment of Learning in Undergraduate Education VALUE initiative to help educators make the best decisions about measuring student learning This book is ideal for university educators and assessment practitioners looking to diversify and enhance their assessment practices A Co Publication with AAC U

Exemplars of Curriculum Theory Arthur K. Ellis, 2014-01-09 This book crosses the divide between theoreticians and practitioners by demonstrating how curriculum theories and models are applied in classrooms today It ties together broad educational theories such as progressivism essentialism perennialism etc curriculum models characterized as learner centered society centered or knowledge centered and exemplars of curriculum theories and models such as Reggio Emilia Core Knowledge the International Baccalaureate etc

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from

across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills *Collecting for the Curriculum* Amy J. Catalano,2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials *Developing Language and Literacy in English across the Secondary School Curriculum* Urszula Clark,2018-07-21 This book draws on original research and a language based pedagogy approach to examine how secondary schools in the UK can devise and implement coherent language and literacy across curriculum policies and strategies so that grammar and associated metalanguage becomes an integral part of their day to day curriculum practices The research was undertaken in three 11 to 18 secondary schools in England where the majority of students are categorised as having English as a second language EAL and where a significant minority are also socially disadvantaged in two of the three The author argues that paying explicit attention to the linguistic structures through which subject knowledge is realised can be of benefit to all pupils in ways that are also socially just and democratic This book provides an important bridge between academic theory and educational practice that will appeal to applied linguists and sociolinguists as well as to teachers teacher trainers and practitioners **Academic Standards in Higher Education** Nicola Reimann,Ian Sadler,Jennifer Hill,2024-08-15 Academic standards in higher education are important but largely misunderstood This book examines the notion of academic standards explaining what they are and why they are important and identifying the many myths that surround them Based on the lessons learnt from the UK wide Degree Standards Project which developed piloted and evaluated a professional development course on degree standards aimed at external examiners the book offers practical

suggestions for ways in which higher education staff can develop a more sophisticated understanding of standards. It discusses the implications of rethinking academic standards for higher education policy and practice through examples and case studies derived from research evidence, the Degree Standards Project, and contributors' own experience and expertise. As a broader approach to assessment literacy, this volume aims to develop readers' standards literacy by challenging routine practices and proposing promising alternatives. Written with a diverse readership in mind, this book is relevant to discipline-based academics, quality officers, academic developers, university leaders and managers, as well as policy makers.

Learning Analytics in Higher Education John Zilvinskis, Victor Borden, 2017-09-28. Gain an overview of learning analytics technologies in higher education, including broad considerations and the barriers to introducing them. This volume features the work of practitioners who led some of the most notable implementations, like the Open Learning Initiative now at Stanford University, faculty-led projects at the University of Michigan including ECoach and SLAM, the University of Maryland Baltimore County's Check My Activity, and Indiana University's FLAGS early warning system, and e-course advising initiatives. Readers will glean from these experiences, as well as from a national project in Australia, on innovative approaches for enhancing student experience, an informed description of the role of feedback within these technologies, and a thorough discussion of ethical and social justice issues related to the use of learning analytics, and why higher education institutions should approach such initiatives cautiously, intentionally, and collaboratively. This is the 179th volume of the Jossey-Bass quarterly report series, *New Directions for Higher Education*, addressed to presidents, vice presidents, deans, and other higher education decision makers on all kinds of campuses; it provides timely information and authoritative advice about major issues and administrative problems confronting every institution.

Congressional Record United States. Congress, 2014. **United States of America Congressional Record, Proceedings and Debates of the 113th Congress Second Session Volume 160 - Part 5**, **Equitable Education for Marginalized Youth in Latin America and the Caribbean** Stacey N. J. Blackman, 2022-09-02. This edited volume examines the thrust toward equity in education for marginalized and out-of-school youth as well as youth with disabilities in countries located in the Global South. Using a critical cross-cultural lens to interrogate the historical, empirical, and theoretical discourses associated with achieving UNESCO's equity in education agenda, the book showcases the work of scholars from developed and developing nations in examining inclusive education. Drawing attention to the nature, impact, and effects of marginalization, the book ultimately demonstrates the ability of education systems in the Global South to be innovative and agile despite current resource challenges. This text will benefit scholars, academics, and students in the fields of international and comparative education, education policy and inclusion, and special educational needs education more broadly. Those involved with Caribbean and Latin American studies, the sociology of education, and diaspora studies in general will also benefit from this volume.
