market including but not limited to manufacturers markets of BTX and downstream functional aromatics aromatics derived from renewable sources and economic forecasts the book will also explore the impact shifting environmental factors will have on the future of aromatic chemistry The text further explores BTX production processes differentiated according to the raw materials used Importantly this will establish the importance and growth of the biobased chemical industry Industrial Arene Chemistry readers will also find Case studies that describe major elements of specific technologies prototyped by contributors companies as part of ongoing market development efforts Process chapters that include summaries of the conventional techniques and a more detailed discussion of recent high impact studies Recent advances in conventional aromatic reactions including alkylation acylation and carboxylation hydrogenation reduction oxidation nitration amination sulfonation and halogenation Industrial Arene Chemistry is a useful reference for chemists and chemical engineers who work with aromatics

Fossil Fuel Hydrogen William J. Nuttall, Adetokunboh T. Bakkenne, 2019-10-31 As the case for Climate Change mitigation becomes ever more pressing hydrogen has the potential to play a major role in a low carbon energy future Hydrogen can drive the vehicles of tomorrow and also heat homes and supply energy to businesses Much recent discussion in energy policy circles has considered ways in which greatly expanded electrification can meet the demand for low carbon mobility and heating Such narratives centre on the widespread use of renewable energy sources with occasionally surplus renewable electricity being used to produce hydrogen for example by electrolysis While such developments have a beneficial role to play this book focuses on an alternative paradigm This book considers a more evolutionary path involving the continued extraction and use of fossil fuels most notably natural gas but in ways that greatly reduce greenhouse gas emissions In this way much established industrial capacity and know how might be transitioned to help deliver the low carbon future that the world so desperately requires Presenting up to date energy policy recommendations with a focus on hydrogen from fossil fuels the book will be of considerable interest to policymakers and energy researchers in academia industry and government labs while also offering a valuable reference guide for business developers in low carbon energy and for oil and gas industry analysts

Plastic Legacies Trisia Farrelly, Sy Taffel, Ian Shaw, 2021-07-12 There is virtually nowhere on earth that remains untouched by plastics and the situation presents a serious threat to our natural world Despite the magnitude of the problem the interventions most often put in place are consumer led and market based and only nominally capable of addressing the issue As the problem worsens and neoliberal ideologies limit the world's responses to this crisis there is a growing need for legislative frameworks that attend to the complex social and ecological issues associated with plastics The contributors to this volume bring expertise from across academic disciplines to illustrate how plastics are produced consumed and discarded and to find holistic and integrated approaches that demonstrate an understanding of the wide ranging problem From the plasticization of earth's oceans to the endocrine disrupting chemicals that have the potential to seriously harm life as we know it these essays beg the question that we all must answer what is our
