- Key Features
- bullet Presents a structured step by step process for performing business analysis that any new or experienced practitioner could follow rather than having to piece the process together themselves
- bullet Addresses stakeholder identification and thoroughly examines stakeholder analysis and management to ensure a deep understanding before planning or engaging stakeholder involvement
- bullet Discusses how to perform situational needs analysis and prepare situational justification for decision makers within the business context
- bullet Demonstrates how to plan the business analysis work effort and develop and execute communication and information management plans
- bullet Shows how to set up a project for success with a clear and concise scope definition boundary maintain agreement on scope and control scope in an ever changing environment
- bullet Provides detailed guidance on developing solution requirements and design definition for building the solution to meet stakeholder needs
- bullet Details the business analysis practitioner s role as the solution is being built

Determining Project Requirements Hans Jonasson,2016-04-19 Good requirements do not come from a tool or from a customer interview They come from a repeatable set of processes that take a project from the early idea stage through to the creation of an agreed upon project and product scope between the customer and the developer From enterprise analysis and planning requirements gathering to documentation
