Policy Guide to Steel Moment-Frame Construction William J. Hall, 2008-07 Prior to the 1994 Northridge and 1995 Kobe earthquakes engineers believed that steel moment frames would bend under earthquake loading but not break As a result this became one of the most common types of construction used for major bldgs in areas subject to severe earthquakes The discovery of the potential for fracturing in these frames called to question the adequacy of the building code provisions dealing with this type of construction and created a crisis of confidence In response FEMA issued this policy guide to provide a non technical summary of valuable information an
