

Thank you

for choosing the Infinity BassLink. BassLink has many features that provide the best of high performance low frequency reproduction that used to require big, bulky speakers, large amplifiers, and complex installations. To ensure maximum performance, we have designed BassLink to be installed in a variety of locations. Although these locations again have to install the BassLink in a general sense, they do not show the specific installation methods for your particular vehicle. If you feel you do not have the necessary tools or experience, do not attempt the installation yourself. Please ask your authorized Infinity car audio dealer about professional installation options.

Remember to keep this manual and your sales receipt in a safe place for future reference.

Infinity BassLink™ instructions

WARNING: Playing loud music in an automobile can permanently damage your hearing as well as hinder your ability to hear traffic. We recommend using low volume levels while driving. Infotune systems no liability for hearing loss, bodily injury or property damage resulting from the use or misuse of this product.

YOUR CAR AND BASS REPRODUCTION

Depending on the interior volume of your vehicle and the dimensions of the passenger compartment and cargo area, reproduced frequencies below 80Hz may be boosted by nearly 12dB before as frequency decreases. This effect, known as that vehicle's "bass reflex function" or "cabin gain," plays an important part in shaping the overall in-car response of the BassLink.

BassLink is designed to reproduce frequencies below about 100Hz, but there may be other speakers in your vehicle that reproduce some of these same frequencies. It is important that all the speakers work together to reproduce frequencies they share. Depending on the orientation of the BassLink and the distance from it to the other speakers, the BassLink and the other speakers may be "in-phase" or "out-of-phase." The resulting conditions, known as constructive and destructive interference, also play a role in shaping the frequency response of your system.

Fortunately, BassLink has controls that may be adjusted to optimize both of these conditions. Successful installation will include "tuning" these adjustments; this process is detailed in a subsequent section of this manual.

INSTALLATION

CHOOSING A MOUNTING LOCATION

Choose a location that doesn't interfere with the loading or unloading of cargo, fold-down rear seats, an opening or closing of the trunk lid. The best location is likely to be the front or rear corner of the trunk or luggage compartment. These locations, in addition to being out of the way, will provide the best audio reproduction in the 80Hz - 100Hz range because the output of the amplifier will be "corner loaded" against the walls of the vehicle. In any case, the BassLink must not interfere with the safe operation of the vehicle.

Once you've chosen a mounting location and made the necessary electrical connections, you're ready to mount BassLink securely to the mounting surface (most likely the floor of the luggage compartment). Caution: Make sure mounting screws will not puncture seating surfaces, brake or fuel lines, or the vehicle's fuel tank. Some or all of these may be located behind or under the mounting surface.

MOUNTING BASSLINK

Slide A nut has been molded into one of the flanges of each of the mounting feet to facilitate the attachment of the feet to BassLink. Orient the feet so that the captive nut is opposite the control panel. The attachment screws may then be passed through the front or top and attached to the nut in the back or bottom. See Figures 1 and 2 for details.

Vertical Mounting: Slide the two vertical mounting feet over the bottom of BassLink until they snap into the indentations molded into the bottom and sides of BassLink. The three side-mounted knurled knobs (controls) should face the interior of the trunk or luggage compartment for easy adjustment. Insert the bolt provided through the hole opposite the mounting foot and tighten it with a screwdriver. Securely mount BassLink to the mounting surface with tapping screws. You will use two bolts to mount BassLink vertically.

Horizontal Mounting: Slide the four horizontal mounting feet over the sides of BassLink until they snap into the indentations molded into the sides and bottom of BassLink. The three side-mounted knurled knobs (controls) should be facing up to allow adjustment after the unit is mounted. Insert the bolt provided through the hole opposite the mounting foot and tighten it with a screwdriver. Securely mount BassLink to the mounting surface with tapping screws. You will use four bolts to mount BassLink horizontally.
