Information Design Robert Jacobson, 2000-08-25 The contributors to this book are both cautionary and hopeful as they offer visions of how information design can be practiced diligently and ethically for the benefit of information consumers as well as producers Information design is the newest of the design disciplines As a sign of our times when the crafting of messages and meaning is so central to our lives information design is not only important it is essential Contemporary information designers seek to edify more than to persuade to exchange more than to foist upon With ever more powerful technologies of communication we have learned that the issuer of designed information is as likely as the intended recipient to be changed by it for better or worse The contributors to this book are
